MESSAGE FROM THE GOVERNOR

I am pleased to present the 28th Banking Supervision Annual Report, which provides an overview of performance of the supervised financial institutions and associated development in Tanzania's financial sector for the year ending 31st December 2024. The report highlights performance of banks and financial institutions regulated and supervised by the Bank of Tanzania. Further, it highlights major activities undertaken and regulatory

changes that occurred during the year.

In 2024, the global financial sector faced significant headwinds stemming from supply chain disruptions, exchange rate volatility, geopolitical tensions including the ongoing conflicts in Ukraine, the Middle East and climate-related challenges. In response, the Bank in collaboration with other stakeholders, implemented targeted policy and regulatory interventions to safeguard stability of the financial sector. Consequently, the Tanzanian banking sector continued to demonstrate strong performance and resilience, particularly in terms of profitability, capitalization, liquidity and asset quality.

Throughout the year, the Bank developed, reviewed, and issued various regulations and guidelines to keep pace with rapid innovations in the financial sector, including the introduction of new products and services as well as developments in international standards. These measures were essential in strengthening supervision, enhancing service delivery, and promoting financial inclusion and sectoral deepening.

I wish to assure the public that the banking sector remains stable, sound, and profitable. Through effective regulation and supervision, the Bank continues to safeguard financial stability while upholding the integrity and soundness of the banking sector and the financial system at large.

Digitally Signed By
Mr. Emmanuel Mpawe TUTUBA
Governor
Go

Governor

Bank of Tanzania

EXECUTIVE SUMMARY

The Bank of Tanzania is mandated to license, regulate and supervise banks, microfinance service providers, mortgage finance institutions, financial leasing companies, bureaux de change, credit reference bureaux and representative offices of foreign banks. In addition, the Bank is vested with the power to regulate and supervise financial matters of social security schemes.

During the year, the Bank issued licenses, and approved acquisitions to enhance compliance, efficiency and performance in the banking sector. The Bank approved the merger of Kilimanjaro Co-operative Bank Limited and Tandahimba Co-operative Bank Limited to form a commercial bank namely Co-operative Bank Tanzania Limited. In addition, the Bank approved the acquisition of the following banks: African Banking Corporation Tanzania Limited by Access Bank (Nigeria) Plc, and change of name with a subsequent name change to Access Bank Tanzania Limited. Access Microfinance Bank (Tanzania) Limited was acquired by Selcom Paytech Limited, followed by a name change to Selcom Microfinance Bank Tanzania Limited. Lastly, Canara Bank Tanzania Limited was acquired by Exim Bank Tanzania Limited.

During the period under review, the banking sub-sector remained sound and stable in terms of capital adequacy, liquidity, asset quality and profitability. Core and total capital adequacy ratios were 19.4 percent and 20.0 percent compared to 17.7 percent and 18.4 percent reported in 2023, respectively. The increase in capital adequacy ratios was attributed to an increase in profitability. The capital adequacy ratios were above the minimum regulatory requirements of 10 and 12 percent for core and total capital, respectively. Asset quality improved as reflected by a decline in the level of non-performing loans (NPLs) ratio to 3.4 percent from 4.4 percent recorded in 2023. This performance was supported by a favorable macroeconomic environment, strong economic growth, enhanced credit risk management practices by banks and financial institutions, and prudent regulatory measures implemented by the Bank.

The ratio of liquid assets to demand liabilities stood at 28.6 percent, a slight decrease from 28.8 percent recorded in 2023, remaining above the minimum regulatory requirement of 20 percent. The slight decrease in liquidity ratio was attributed to a shift in the portfolio towards more profitable investments such as loans, advances and overdrafts. Profitability improved as depicted by an increase in return on assets (ROA)

and return on equity (ROE) to 5.2 percent and 23.7 percent from 4.4 percent and 20.5 percent recorded in the preceding year, respectively. The increase in profitability was driven by growth in interest income consistent with growth of the loan portfolio, a rise in non-interest income and improvement in operational efficiency. The ratio of net open position to core capital increased to 4.7 percent from 4.5 percent reported in the preceding year, implying moderate exposure to foreign exchange risk.

Total assets increased by 14.4 percent to TZS 62,203.8 billion compared to TZS 54,396.0 billion recorded in the preceding year, mainly financed by an increase in deposits, borrowings and profit made during the year. Deposits increased by 12.3 percent to TZS 42,772.1 billion from TZS 38,076.5 billion recorded in the preceding year. The improvement was attributed to increased public confidence in the banking sector, improved business environment and deposit mobilization strategies instituted by banks and financial institutions. Loans, advances and overdrafts grew by 14.3 percent to TZS 36,591.0 billion compared to TZS 32,011.0 billion reported in the corresponding period in 2023. The growth was attributed to favourable macroeconomic environment, the Bank's accommodative monetary policy and regulatory measures taken to boost the private sector's credit growth.

The sector's outreach continued to expand through branch network, agent banking, digital and other delivery channels. The number of bank branches increased to 1,028 from 1,011 reported in 2023. Agent banking continued to expand, with significant growth observed in the number of agents, transactions, and the value of deposits and withdrawals. The number of agents grew by 37.0 percent reaching 145,430, while the volume of cash deposits and withdrawals increased by 20.3 percent and 18.6 percent, amounting to 105,184,411 and 60,262,304 transactions, respectively.

Banks and bureaux de change continued to offer the services of buying and selling foreign currencies. As at the end of the year, 34 commercial banks and 44 bureaux de change with 141 branches across the country provided exchange services to the public. The Bank continued to strengthen supervision of bureaux de change to enhance compliance with legal and regulatory requirements.

During the year 2024, the Bank issued 765 licenses to non-deposit taking microfinance service providers (Tier 2) whereas Tanzania Cooperative Development Commission (TCDC) licensed 80 SACCOS and Local Government Authorities (LGAs) registered

10,642 Community Microfinance Groups.

The Bank continued to engage in regional and international fora to promote harmonization of supervisory rules and practices, strengthen cooperation, and stay informed about developments in both regional and global regulatory environments. In addition, the Bank participated in supervisory colleges to deepen its understanding of risks associated with cross-border banking groups and to support enhanced effective supervision.

The Bank reaffirms its commitment to enhancing its capacity to assess and supervise climate-related financial risks. It will maintain close oversight of how supervised institutions incorporate climate risk considerations into their operations.

As part of initiative to develop a regulatory and supervisory framework for non-interest (Islamic) banking in the United Republic, amendments were made to key legislation to establish a foundation for the effective regulation and supervision of non-interest banking operations. Additionally, the Bank reaffirms that the effective management of Anti-Money Laundering and Countering the Financing of Terrorism (AML/CFT) remains a top priority. Strengthening AML/CFT frameworks is critical to preserving the integrity, stability, and resilience of the financial system.

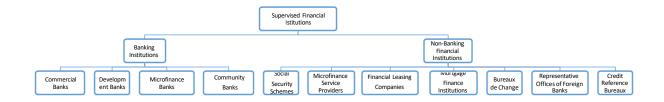

The Bank shall continue to implement necessary policies, regulatory and supervisory measures as well as collaborating with other stakeholders to ensure the banking sector remains safe, sound and stable to support the national economy.

CHAPTER ONE

1.0 FINANCIAL INSTITUTIONS SUPERVISED BY THE BANK OF TANZANIA

Tanzania's financial sector is composed of five sub-sectors namely: banking, social security, insurance, capital markets, and microfinance. Among these, the banking sub-sector is the most dominant, accounting for 70.2 percent of the sector's total assets. The Bank of Tanzania Act, Cap 197, Banking and Financial Institutions Act, Cap 342, the Microfinance Act, Cap 348, Foreign Exchange Act, Cap 271, and Social Security Act, Cap 135, gives powers to the Bank of Tanzania to license, regulate, and supervise banking and non-banking financial institutions. Figure 1.1 depicts the structure of financial institutions supervised by the Bank of Tanzania.

Figure 1.1: Financial Institutions Supervised by the Bank

1.1 Banking Institutions

Banking institutions comprise of commercial banks, development banks, microfinance banks and community banks.

1.1.1 Commercial Banks

Commercial banks are institutions licensed to provide banking services without limitations in terms of size, locations served or permissible activities. As of December 2024, there were 34 commercial banks with 929 branches accounting for 97. 3 percent of the total banking sector assets. Out of 34 banks, 12 were locally owned accounting for 65.7 percent of the commercial banks assets, while 22 were foreign owned accounting for 34.3 percent of assets.

1.1.2 Development Banks

As of December 2024, there were two state-owned development banks operating through 11 branches. Collectively, these banks accounted for 2.2 percent of the total assets of the banking sector. The banks specialized in mobilizing long-term financing to support medium and long-term development projects.

1.1.3 Microfinance Banks

As of December 2024, there were three microfinance banks operating in the country, all foreign owned, with 77 branches and accounting for 0.4 percent of the overall assets of the banking sector. Microfinance banks are licensed to conduct banking activities primarily targeting individuals, groups, and micro and small enterprises.

1.1.4 Community Banks

As of December 2024, there were three community banks in operation, all locally owned, with a total of 11 branches. The assets held by community banks made up 0.1 percent of the total assets in the banking sector. Community banks are licensed to offer banking services within specified geographical location.

1.2 Non-Banking Financial Institutions

Non-banking financial institutions are entities that offer specialized financial services. These institutions include social security schemes, microfinance service providers, mortgage finance institutions, financial leasing companies, bureaux de change, credit reference bureaux, and representative offices of foreign banks.

1.2.1 Social Security Schemes

As of December 2024, there were four mandatory social security schemes: Public Service Social Security Fund (PSSSF), National Social Security Fund (NSSF), National Health Insurance Fund (NHIF), and Workers Compensation Fund (WCF). PSSSF and NSSF function as pension funds serving the public and private sectors, respectively. NHIF provides health insurance coverage, while WCF offers workers' compensation benefits. Additionally, there were 14 registered supplementary schemes serving both public and private sectors (**Appendix VIII**).

1.2.2 Microfinance Service Providers

These are entities or individuals licensed or registered to conduct microfinance business. Microfinance service providers are categorized into four tiers, including Tier 1 (microfinance banks), Tier 2 (non-deposit taking microfinance service providers), Tier 3 (savings and credit cooperative societies) and Tier 4 (community microfinance groups). To enhance supervisory effectiveness, the Bank delegated oversight responsibilities to the Tanzania Cooperative Development Commission (TCDC) for Tier 3 and to Local Government Authorities (LGAs) for Tier 4.

During the period under review, the Bank licensed 765 new Tier 2 Microfinance Service Providers (MSPs) resulting in a total of 2,342. Further, TCDC licensed 80 new Savings and Credit Cooperative Societies resulting in a total of 964, while Local Government Authorities registered 10,642 new Community Microfinance Groups resulting to a total of 58,926.

1.2.3 Mortgage Finance Institutions

There were two mortgage institutions licensed to offer both wholesale and retail mortgage loans. These were Tanzania Mortgage Refinancing Company (TMRC), which specializes in providing pre-financing and refinancing wholesale mortgage loans to banks and financial institutions, and First Housing Finance (Tanzania) Limited that provides retail mortgage loans directly to the public.

1.2.4 Financial Leasing Companies

As of December 2024, there were four financial leasing companies with a total of 11 branches (**Appendix VIII**). Financial leasing companies offer asset financing through lease arrangements, enabling clients to access assets without collateral or large upfront payments.

1.2.5 Bureaux de Change

As of December 2024, there were 44 bureaux de change operating through 141 branches, in addition to 34 commercial banks providing similar services to the public. The majority of bureaux de change branches were located in Dar es Salaam (47.5 percent), followed by Zanzibar (19.9 percent), Arusha (16.3 percent), Kilimanjaro (5.0

percent), and other regions (11.3 percent). Further, there were eight hotels offering services of buying and selling of foreign currencies.

1.2.6 Credit Reference Bureaux

Credit reference bureaux are institutions licensed to collect, process, and share credit information of individuals and entities. As of December 2024, there were two licensed credit reference bureaux namely: Dun & Bradstreet Credit Bureau Tanzania Limited and Creditinfo Tanzania Limited. Credit reports support credit assessment process by helping lenders to determine creditworthiness of prospective borrowers. This contributes to reducing non-performing loans and promoting financial sector stability.

1.2.7 Representative Offices of Foreign Banks

As of December 2024, there were two representative offices of foreign banks, namely Export-Import Bank of Korea and Bank of China Limited.

Representative offices served as liaison offices in gathering market intelligence, conducting research, and sharing information on business opportunities in Tanzania with the parent banks and clients. They also continued to inform Tanzanian customers about the financial products and services offered by their parent institutions.

CHAPTER TWO

2.0 SUPERVISORY ACTIVITIES AND OTHER DEVELOPMENTS

2.1 Licensing

In 2024, the Bank issued licenses, and approved acquisition of banks and financial institutions to enhance compliance, efficiency and performance. The Bank licensed the following:

- (a) 31 Bureaux de Change, out of which thirty (30) were locally owned and one (1) was foreign owned; and
- (b) 765 non-deposit taking microfinance service providers, while the delegated authorities licensed 80 SACCOS and registered 10,642 Community Microfinance Groups.

Further, the Bank approved the following:

- (a) Merger of two community banks, namely Kilimanjaro Co-operative Bank Limited and Tandahimba Co-operative Bank Limited to form a commercial bank namely Co-operative Bank Tanzania Limited;
- (b) Acquisition of African Banking Corporation Tanzania Limited by Access Bank (Nigeria) Plc, and change of name to Access Bank Tanzania Limited;
- (c) Acquisition of sixty five percent of shares of Access Microfinance Bank (Tanzania) Limited by Selcom Paytech Limited and change of name to Selcom Microfinance Bank Tanzania Limited: and
- (d) Acquisition of Canara Bank Tanzania Limited by Exim Bank Tanzania Limited.

As a result of these changes, the number of commercial, development and microfinance banks remained the same as in 2023, while community banks decreased from five to three (**Table 2.1**).

Table 2.1: Categories and Number of Banking Institutions

Category	2024	2023	2022	2021	2020
Commercial banks	34	34	34	34	35
Development banks	2	2	2	2	2
Microfinance banks	3	3	4	5	4
Community banks	3	5	5	5	5
Total	42	44	45	46	46

Source: Bank of Tanzania

2.2 Regulatory Activities

During the period, acts, regulations, circulars and codes of conduct were issued and reviewed to ensure stability of the financial sector. The reviewed Acts, regulations, guidelines and circulars were as follows:

- a) The following amendments were made to the Acts;
 - (i) The Banking and Financial Institutions Act, Cap 342 was amended to accommodate non-interest banking and to provide for management of abandoned properties;
 - (ii) The Bank of Tanzania Act, Cap 197 was amended to prohibit the use of foreign currencies in domestic transactions and to accommodate non-interest banking; and
 - (iii) The Microfinance Act, Cap 348 was amended to accommodate non-interest microfinance business.
- b) The Bank issued the Bank of Tanzania (Fintech Regulatory Sandbox) Regulations, 2024;
- c) The Bank issued Guidance Note on Digital Lenders Under Tier 2 Microfinance Service Providers, 2024;
- d) During the period the Bank issued the following circulars:
 - (i) Circular requiring banks and financial institutions to submit information on the proportion of personal loans issued to MSMEs;
 - (ii) Circular reminding banks and financial institutions to comply with anti-money

- laundering and customer due diligence requirements;
- (iii) Circular reminding all banks and financial institutions to utilize credit reports from licensed credit reference bureaux during credit appraisal; and
- (iv) Circular requiring all banks, financial institutions, non-bank payment system providers, electronic money issuers and other regulated entities to conduct business with only the licensed cybersecurity service providers.
- e) The Bank of Tanzania issued Code of Conduct for Interbank Foreign Exchange Market, 2024 to ensure the efficiency and integrity of market participants.

2.3 Supervisory Activities

In executing its supervisory mandate, the Bank uses off-site surveillance and on-site examinations approaches to supervise banks and non-banking financial institutions.

2.3.1 Off-site Surveillance

Off-site surveillance entails collecting and analyzing periodic regulatory returns and other publicly available information with a view to determine financial performance and conditions of supervised financial institutions. In addition, through analysis of periodic regulatory returns, the Bank was able to assess and enforce compliance with existing laws and regulations. **Chapter 3** provides assessment arising from the off-site surveillance.

2.3.2 On-site Examinations

The Bank continued to conduct full-scope and targeted on-site examinations of banks and non-banking financial institutions under the risk-based supervision framework. The Bank ensured that banks and non-banking financial institutions took prompt corrective actions to address anomalies identified during the examinations through ongoing monitoring. Further, the Bank in collaboration with the Prime Minister's Office - Labour, Youth, Employment and Persons with Disabilities (PMO-LYED) conducted on-site examinations of mandatory and supplementary social security schemes.

2.4 Capacity Building

To enhance its supervisory and regulatory capacity, the Bank continued to embark on diverse training, largely focusing on pertinent issues and groups, including:

- (a) Internal capacity building for staff to strengthen supervisory and regulatory capabilities. The programs included training on the implementation of Basel II and III, prudential regulations; Anti-Money Laundering and Combat of Financing of Terrorism; Climate-Related Financial Risk Management; Regulatory Returns; Emerging issues and new regulations such as Bureaux de change regulations, Stress Testing and Overview of Tier 4, Licensing and Supervision System (Wezesha Portal); and
- (b) Capacity building programs to external stakeholders to raise awareness on compliance with laws and regulations governing supervised financial institutions. The programs included: implementation of Basel II and III; impairment provision as per IFRS 9 and BOT regulations; BOT regulatory returns; regulatory compliance for bureaux de change; credit reference bureaux operations; corporate governance practices to board of directors and management of banks and financial institutions; training on regulatory compliance to senior management of banks and financial institutions and awareness sessions to parliamentary committees' members regarding roles and functions of Directorate of Financial Sector Supervision. Further, public awareness programs were conducted through media, exhibitions and workshops.

2.5 Other Activities

Other activities implemented by the Bank to enhance efficiency of its supervisory and regulatory functions include:

- (a) Development of Real-Time Supervision Information System (RTSIS) to enable collection, analysis and visualization of data in real time to enhance off-site surveillance of banks and financial institutions;
- (b) To enhance supervisory effectiveness and align with evolving market developments, the Banking and Financial Institutions Act was amended in

January 2023, while capital adequacy and liquidity management regulations were revised in October 2023, to enable the adoption of Basel II and III standards. The Bank provided moratorium period of six months for banks and financial institutions to adjust their systems and data granularity to meet Basel II and III requirements; and additional 12 months parallel run to assess whether implementation of Basel II/III achieved the intended results. The parallel run is expected to end in April 2025;

- (c) Development of a new Credit Reporting Databank System (CRDS), which aims to address challenges associated with the old CRDS including inability to use some identity cards, inefficiency in system performance, and limited batch size;
- (d) In line with its mandate to ensure financial sector stability amid growing climate and environmental risks, the Bank of Tanzania continued to implement key international standards, including Task Force for Climate-Related Financial Disclosures, Network for Greening the Financial System, and Basel Committee Banking Supervision Principles for the effective management and supervision of climate-related financial risks. To strengthen oversight, the Bank began preparations to adopt IFRS Sustainability Standards (IFRS S1 and S2). Further, the Bank initiated development of a climate data repository to enhance risk assessment and will continue monitoring institutions' progress while providing capacity building on climate-related financial risk management;
- (e) As part of its continued commitment to strengthening the integrity and resilience of the financial system, the Bank continued to strengthen its AML/CFT/CPF Risk-Based Supervision through risk assessments, off-site, on-site inspections, and the application of sanctions for non-compliance. These efforts were recognized during the face-to-face meeting with the FATF Africa Joint Group held in Brussels, Belgium, where the Bank was commended for its progress, marking a significant step toward exiting the Grey List. In addition, the Bank, in collaboration with other AML/CFT/CPF stakeholders, received technical assistance from the Global Centre on Cooperative Security (GCCS), a U.S.-based NGO funded by the U.S. Government, to conduct risk assessment on Virtual Assets (VA) and Virtual Asset Service Providers (VASPs); and

(f) The Bank continued with efforts to develop a regulatory and supervisory framework for non-interest (Islamic) banking in the United Republic. As part of this initiative, amendments were made to key legislation namely, the Bank of Tanzania Act (Cap. 197 of 2006), the Banking and Financial Institutions Act (Cap. 342 of 2006), and the Microfinance Act (Cap. 407 of 2018). These amendments were designed to establish a foundation for the effective regulation and supervision of non-interest banking operations.

CHAPTER THREE

3.0 PERFORMANCE OF SUPERVISED FINANCIAL INSTITUTIONS

Tanzania financial sector continued its growth trajectory in 2024 supported by economy's resilience to external shocks, strong capital and liquidity buffers held by the supervised financial institutions, and effective policy measures implemented by Bank of Tanzania. Performance of the supervised financial institutions involves analysis of major balance sheet items namely: total assets, deposits, capital and liabilities as well as Financial Soundness Indicators (FSIs). Additionally, evaluation of performance of social security schemes involves analysis of investment assets, members' contributions and investment income performance.

3.1 Banking Institutions

The banking sector remained profitable and adequately capitalized in 2024, with a sufficient level of liquidity and improved asset quality, supported by favourable economic conditions. The sector remained resilient to internal and external shocks and continued to grow in terms of deposits and assets, supported by fiscal and monetary policy interventions as well as enhanced regulatory and supervisory measures.

3.1.1 Assets Structure

As of December 2024, loans, advances and overdrafts, constituted the largest share of banking sector assets at 58.8 percent, followed by investment in debt securities (13.1 percent), and cash, balances with Bank of Tanzania, balances with other banks and items for clearing (15.4 percent). The remaining assets accounted for 12.7 percent of total assets.

Total assets increased by 14.4 percent to TZS 62,203.8 billion, from TZS 54,396.0 billion recorded in 2023, mainly financed by an increase in deposits, borrowings and profit made during the year.

Loans, advances and overdrafts grew by 14.3 percent to TZS 36,591.0 billion, compared to TZS 32,011.0 billion reported in the corresponding period in 2023. The growth was attributed to a favourable macroeconomic environment, the Bank's accommodative monetary policy and regulatory measures taken to boost private

sector's credit growth (Figure 3.1).

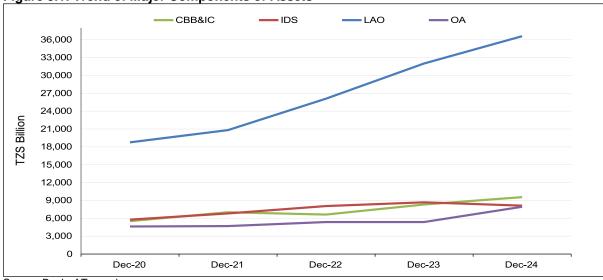

Figure 3.1: Trend of Major Components of Assets

Source: Bank of Tanzania

Note: CBB&IC- Cash, Balance with other Banks and Items for Clearing; IDS - Investment in Debt Securities; LAO - Loans, Advances and Overdrafts and OA – Other Assets.

Earning assets¹ increased by 13.6 percent to TZS 52,156.9 billion, from TZS 45,907.6 billion recorded in 2023. The ratio of earning assets to total assets decreased to 83.8 percent from 84.4 percent recorded in 2023. The ratio indicates that a significant part of the sector's assets continued to be channeled to productive sectors of the economy (**Table 3.1**).

Table 3.1: Earning Assets Trend

						125 Billions
Item	Dec-24	Dec-23	Dec-22	Dec-21	Dec-20	Dec-19
Total Earning Assets	52,156.9	45,907.6	38,175.0	32,016.4	28,362.5	26,435.0
Total Assets	62,203.8	54,396.0	46,159.5	39,346.3	34,689.5	33,161.8
Total Earning Assets to Total Assets (Percent)	83.8	84.4	82.7	81.3	81.8	79.7

Source: Bank of Tanzania

3.1.2 Liability Structure

Major components of the sector's liabilities were deposits and borrowings, which accounted for 81.8 percent and 12.9 percent of total liabilities, respectively, while the remaining liabilities accounted for 5.3 percent of total liabilities. Total liabilities of the sector increased by 12.9 percent to TZS 52,306.7 billion compared to TZS 46,316.7

¹ Earning assets comprised of loans, advances and overdrafts (70.1 percent); investments in debt securities (15.6 percent); interbank loans (7.9 percent), balances with other banks and financial institutions (5.6 percent); equity investments (0.6 percent) and commercial & other bills (0.2 percent) of the total earning assets.

billion recorded in 2023. The increase was attributed to a rise in deposits and borrowings. Total Deposits² increased by 12.3 percent to TZS 42,772.1 billion from TZS 38,076.5 billion recorded in preceding year whereas, local and foreign currency deposits increased by 12.3 percent and 17.1 percent to TZS 30,472.3 billion and TZS 12,299.9 billion, respectively. The increase reflects improvement in public confidence in the banking sector, improved business landscape and deposit mobilization strategies adopted by banks and financial institutions. Similarly, borrowings increased by 22.1 percent to TZS 6,756.2 billion from TZS 5,531.4 billion. (**Figure 3.2**).

■ Local currency deposits ■ Foreign currency deposits ■ Other liabilities ■ Total deposits 45,000 40,000 35,000 30,000 TZS Billion 25,000 20,000 15,000 10,000 5,000 Dec-20 Dec-21 Dec-22 Dec-23 Dec-24

Figure 3.2: Liabilities Composition and Trend

Source: Bank of Tanzania

3.1.3 Capital Structure

The sector's capital structure was comprised of retained earnings (44.9 percent), share capital (28.6 percent), share premium (4.8 percent) and other capital items (21.7 percent) (**Table 3.2**). Capital increased by 22.5 percent to TZS 9,897.1 billion, from TZS 8,079.1 billion recorded in the previous year. This growth is mainly driven by increase in retained earnings by 36.2 percent to TZS 4,445.6 billion from TZS 3,264.4 billion in 2023. Profitability increased by 28.4 percent to TZS 1,962.4 billion from TZS 1,527.9 billion recorded in the preceding year. These gains underscore the sector's

² Total Deposits include deposit liabilities other than banks, special deposit accounts and deposits from banks and financial institutions.

resilience and its strengthened capacity to absorb potential shocks.

3.1.4 Off-Balance Sheet Items

Off-balance sheet items comprised of guarantees and indemnities (71.0 percent), letters of credit (20.4 percent), undrawn balances of loans and overdrafts (9.5 percent), bills for collections (0.4 percent) and others (-1.2 percent³). Off-balance sheet items increased by 8.2 percent to TZS 16,230.4 billion compared to TZS 15,002.5 billion recorded in 2023 (**Table 3.3**). The increase was due to participation of banking sector in trade financing and facilitation of Government strategic projects through guarantees. The off-balance sheet items were 26.1 percent of total assets compared to 27.6 percent recorded in the preceding year.

_

³ Net forward exchange (forward exchange sold - forward exchange bought) was negative

Table 3.3: Off-Balance Sheet Items

3.1.5 Financial Soundness Indicators

Financial Soundness Indicators (FSIs) are used to assess the health, stability and resilience of country's banking sector and typically measure capital adequacy, asset quality, earnings, liquidity and sensitivity to market risk. Overall, performance of the banking sector remained satisfactory as reflected by Financial Soundness Indicators (**Appendix IV**).

3.1.5.1 Capital Adequacy

The sector remained adequately capitalized as capital adequacy ratios were higher than regulatory thresholds and ratios recorded in the preceding period. Core and total capital adequacy ratios increased to 19.4 percent and 20.0 percent, up from 17.7 percent and 18.4 percent reported in 2023, respectively. The increase in capital adequacy ratios reflects the enhanced banking sector's capacity to absorb shocks that arising from both internal and external environments.

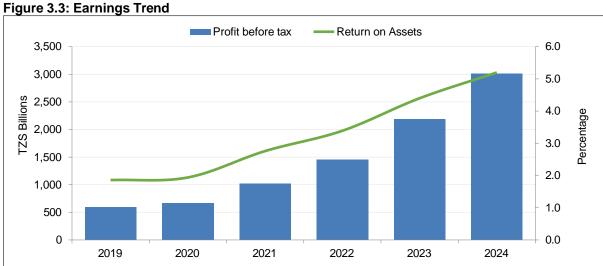

3.1.5.2 Asset Quality

Asset quality improved as evidenced by a decrease in the non- performing loan ratio to 3.4 percent from 4.4 percent recorded in 2023. The ratio was within the Bank's tolerable threshold of not more than 5.0 percent. The improvement was attributed to enhanced credit risk management practices by banks and financial institutions and measures instituted by the Bank. The measures included monitoring of implementation

of NPLs reduction strategies; strengthening credit risk management practices; and enhancement of staff integrity.

3.1.5.3 Earnings

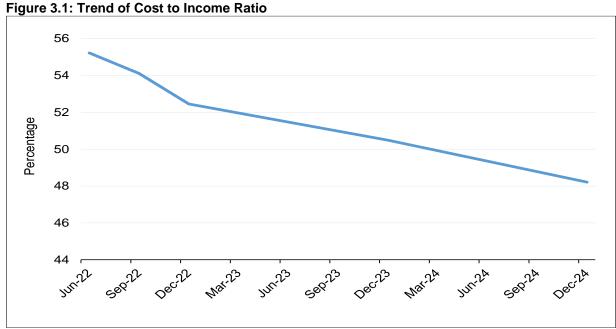

The sector remained profitable as depicted by an increase in profit of 39.3 percent to TZS 2,129.0 billion, from TZS 1,527.9 billion reported in 2023. Return on assets and equity increased to 5.2 percent and 23.7 percent from 4.4 percent and 20.5 percent recorded in 2023, respectively (**Figure 3.3**). The increase in profit was driven by growth in interest income consistent with growth of loan portfolio, a rise in non-interest income and improvement in operational efficiency. Non-interest expenses to total income ratio decreased to 37.3 percent from 40.3 percent mainly due to increase in interest and non-interest income by 27.1 percent and 21.6 percent, respectively.

Source: Bank of Tanzania

The cost to income ratio⁴ of banks and financial institutions continue to trend downwards reaching 48.2 percent in 2024 from 50.5 percent recorded in the preceding year, which was within the tolerable limit of 55 percent. This suggests improvement in operational efficiency and the banks' adherence to best practices in expenses management. (**Figure 3.4**).

⁴ Cost to Income Ratio is computed by dividing Non-Interest Expenses to the sum of Net Interest income and Non-Interest Income.

Source: Bank of Tanzania

3.1.5.4 Liquidity

Banks maintained adequate liquidity, sufficient to meet maturing obligations and fund growth of assets. The ratio of liquid assets to demand liabilities remained fairly stable at 28.6 percent compared to 28.8 percent reported in 2023, above the minimum regulatory requirement of 20 percent. The slight decline in liquidity ratio was attributed to portfolio shift to more profitable investments including loans, advances and overdraft. The ratio of gross loans to deposits remained stable at 92.5 percent as reported in December 2023, implying banks continued to rely on deposits as their main source of funding.

3.1.5.5 Sensitivity to Market Risk

The ratio of net open position to total capital increased to 4.7 percent from 4.5 percent reported in the preceding year, which was within the regulatory requirement of +/- 10.0 percent, implying a slight increase in banks' exposure to foreign exchange risk. The ratio of foreign currency denominated assets to total assets and foreign currency denominated liabilities to total liabilities were 28.0 percent and 32.2 percent compared to 29.8 percent and 35.2 percent recorded in 2023, respectively. The marginal decline in foreign currency denominated assets and liabilities indicates market adjustment in response to tightened forex liquidity conditions observed during the year.

3.1.5.6 Market Concentration

Assessment of the market share in the banking sector revealed that the ten largest banks continued to dominate in 2024 across key indicators including total assets, loans, deposits, and capital (**Table 3.4**). This dominance was largely attributed to their broad customer base and extensive branch networks. Additionally, banks under local ownership held a greater share of assets compared to foreign-owned banks (**Table 1.3**).

Table 3.4: Market Share of Ten Largest Banks

	Assets		Loans		Deposits		Capital	
Market share	Dec-24	Dec-23	Dec-24	Dec-23	Dec-24	Dec-23	Dec-24	Dec-23

Foreign banking institutions	33.7	29.3	29.9	24.9	35.3	30.1	34.4	30.3

Source: Bank of Tanzania

3.1.5.7 Distribution Channels

Banking services were delivered through multiple channels including branches, agent banking, and digital platforms with increasing availability and usage, contributing to enhanced financial inclusion. As of December 2024, the number of bank branches increased by 1.7 percent to 1,028 from 1,011 recorded in 2023 (**Appendix V**).

Agent banking continued to increase, with significant growth observed in the number of agents, transactions, and the value of deposits and withdrawals. The number of agents grew by 37.0 percent, reaching 145,430, while the volume of cash deposits and withdrawals transactions increased by 20.3 percent and 18.6 percent, amounting to 105,184,411 and 60,262,304 transactions, respectively (**Table 3.6**).

This multi-channel banking approach has enabled reaching previously unbanked and underbanked populations, especially in rural and remote areas. Agent banking and mobile platforms have brought banking services to places where branches are not

viable. Also, customers can now access banking services beyond banking hours. Further, mobile and digital platforms reduce the need to travel long distances to a branch, hence increases customer satisfaction and engagement.

Table 3.6: Agent Banking Transactions

		Cash Deposit	Cash Wit	hdrawals	
	Number of Agents	Volume	Value in TZS Billion	Volume	Value in TZS Billion
2024	145,430	105,184,411	96,694.8	60,262,304	32,617.4
2023	106,176	87,463,083	74,914.4	50,795,424	23,789.5
Growth (Percent)	37.0	20.3	29.1	18.6	37.1

Source: Bank of Tanzania

Despite the efforts to expand the variety of banking channels, distribution of bank agents was concentrated in major urban centers. Regions with at least 5 percent of the total bank agents included Dar es Salaam (31.2 percent), Mwanza (7.1 percent), Arusha (6.7 percent), Dodoma (5.3 percent), and Mbeya (5.0 percent), as shown in **Appendix VI.**

3.2 Non-banking Financial Institutions

3.2.1 Social Security Schemes

Performance of social security schemes continued to improve as evidenced by growth in investment assets driven by increase in member contributions and investment income. Member contributions grew by 11.8 percent to TZS 4,897.8 billion in 2024, compared to TZS 4,382.4 billion in 2023, attributed to increase in employment in both government and private sector, as well as improved compliance. Investment assets rose by 11.3 percent reaching TZS 19,054.0 billion, from TZS 17,118.8 billion. Investment income grew by 9.7 percent to TZS 1,328.5 billion from TZS 1,210.7 billion, indicating better returns on invested funds.

The performance highlights enhanced financial sustainability in the social security sector, driven not only by increased participation (through higher contributions) but also by enhanced effective investment management.

3.2.2 Microfinance Service Providers

As of December 2024, the number of licensed Tier 2 Microfinance Service Providers

(Tier 2 MSPs) increased to 2,342 from 1,579 recorded in 2023 while outstanding loans increased to TZS 1,073.3 billion from TZS 962.3 billion. Tier 2 MSPs were mainly concentrated in Dar es Salaam (29.3 percent), Mwanza (9.6 percent), Arusha (5.8 percent), Mbeya (5.8 percent), Dodoma (5.6 percent) and other regions (43.8 percent)⁵.

As for Tier 3 MSPs (SACCOS) and Tier 4 MSPs (Community Microfinance Groups), the number rose to 959 and 58,926 in 2024 from 884 and 48,284 in 2023, respectively. Tier 3 MSPs were mainly located in Dar es Salaam (29.1 percent), Arusha (11.4 percent) Kilimanjaro (8.0 percent), Mbeya (6.9 percent), Dodoma (4.4 percent) and others (40.3 percent). Further, registered Tier 4 MSPs were mainly concentrated in Arusha (26.6 percent), followed by Mwanza (7.1 percent), Mbeya (6.3 percent), Mara (5.9 percent), Morogoro (5.9 percent) and others (48.2 percent). The geographical distribution of MSPs is shown in **Appendix VII**.

To ensure financial consumers are protected from unfair practices, the Bank, among others, conducted public awareness programs and capacity building to MSPs and required all licensed microfinance services providers to establish customer complaints handling mechanisms and the use reducing balance method for interest rate computation. Also, the Bank continued to invoke regulatory sanctions to MSPs that violated laws and regulations.

3.2.3 Mortgage Finance Institutions

Mortgage finance institutions continued to improve as portrayed by growth in both total assets and the mortgage loan portfolio. Total assets increased by 2.6 percent to TZS 262.8 billion from TZS 255.9 billion recorded in 2023. Equally, the mortgage loan portfolio grew by 11.3 percent to TZS 197.6 billion from TZS 177.5 billion in the previous year. The increase in total assets was primarily contributed by an increase in borrowing, which was the major source of funding.

In terms of funding structure, borrowings remained the major source, accounting for 77.2 percent of total funding, while shareholders' equity contributed 22.8 percent. This reflects a continued reliance on debt financing to support mortgage lending operations.

_

⁵ List of Tier 2 MSPs is available at https://www.bot.go.tz/BankSupervision/Institutions

Mortgage finance institutions remained adequately capitalized, complying with the minimum regulatory capital requirements. In 2024, total capital increased to TZS 59.8 billion, from TZS 54.1 billion recorded in 2023.

Despite the overall growth in assets and lending, profitability declined during the year. Net profit decreased to TZS 1.7 billion from TZS 2.8 billion in 2023 mainly due to an increase in both interest and operating expenses. Interest expenses increased by 2.3 percent to TZS 15.2 billion from TZS 14.9 billion recorded in the preceding year, in line with increase in borrowings. Operating expenses also increased by 3.6 percent to TZS 9.9 billion from TZS 9.5 billion, driven by growth in mortgage portfolio.

3.2.4 Financial Leasing Companies

Total assets⁶ of financial leasing companies surged by 229.0 percent to TZS 335.9 billion from TZS 102.1 billion recorded in the preceding year. Similarly, the finance lease portfolio expanded by 259.7 percent to TZS 291.7 billion, compared to TZS 81.1 billion recorded in 2023. The growth was largely driven by increase in business that necessitated borrowing. Borrowing was the major source of funding for the lease companies, accounting for 89.3 percent of total funding compared to shareholders' equity share of 10.7 percent.

Profitability improved significantly as well, with net profit increasing by 147.4 percent to TZS 10.4 billion from TZS 4.2 billion recorded in 2023. The strong performance underscores the expanding role of financial leasing in supporting asset-based financing and enhancing access to capital for businesses.

3.2.5 Bureaux de Change

Bureau de change activities declined, as evidenced by a decrease in both foreign currency purchases and sales transactions in the retail market, driven by external shocks experienced in 2024. Foreign currency purchases amounted to USD 5.9 billion, a 22.3 percent decrease compared to USD 7.6 billion recorded in 2023. Similarly, foreign currency sales declined by 32.3 percent to USD 5.2 billion compared to USD 7.6 billion.

⁶ Total assets comprised finance leases, operating leases, cash and cash equivalents and other assets.

3.2.6 Credit Reference Bureaux

The use of credit reference bureaux services remained relatively stable in 2024, reflecting a continued integration of credit information into the lending process. The total number of credit inquiries stood at 16,169,944, slightly lower than 17,001,917 recorded in 2023. Similarly, the number of credit reports sold decreased to 9,128,829 from 9,749,405 recorded in the previous year.

CHAPTER FOUR

4.0 DOMESTIC, REGIONAL AND INTERNATIONAL COOPERATION

The Government of Tanzania is a member of regional and international bodies, including the East African Community (EAC), Southern African Development Community (SADC), African Union (AU), World Bank (WB) and United Nations (UN). The Bank participates in domestic, regional and international fora to strengthen cooperation and foster economic integration and development. Details on areas of cooperation are as follows:

4.1 Domestic Cooperation

During the year 2024, the Bank continued to engage with domestic stakeholders through various meetings aimed at addressing key issues affecting the development of the banking sector, with a focus on maintaining the stability and integrity of the financial system. As a member of the Tanzania Financial Stability Forum (TFSF), the Bank collaborated closely with several domestic associations including the Tanzania Bankers Association (TBA), Tanzania Association of Microfinance Institutions (TAMFI), National Council for Financial Inclusion (NCFI), Tanzania Microfinance Union (TAMIU), and Tanzania Social Security Association (TSSA) to address emerging challenges in the sector.

4.2 Regional Cooperation

The Bank of Tanzania is a member of the Monetary Affairs Committee (MAC) of the EAC; the Association of African Central Banks (AACB) of the African Union (AU); the Committee of Central Bank Governors (CCBG) of the SADC; the Eastern and Southern Africa Anti-Money Laundering Group (ESAAMLG); East African Pension Supervisors Association (EAPSA); the Community of African Banking Supervisors (CABS), and Committee of Insurance, Securities and Non-Bank Financial Service Regulatory Authorities (CISNA).

4.2.1 Monetary Affairs Committee

The Monetary Affairs Committee (MAC) of the East African Community (EAC) is composed of Governors of Central Banks of the eight EAC Partner States, which are

Tanzania, Kenya, Uganda, Rwanda, Burundi, South-Sudan, the Democratic Republic of Congo (DRC) and Somalia. The main functions of the MAC include: to coordinate efforts made by EAC Central Banks towards greater regional financial integration, stability and harmonization of banking sector policies. The key focus areas include financial stability, banks supervision, financial crisis resolution and management, and improving banking sector surveillance tools to ensure domestic and regional financial system stability.

MAC initiatives are implemented through committees or Technical Working Groups (TWG) composed of technical officials from the Partner States Central Banks. During the year 2024, the Bank of Tanzania participated in regional technical workshops and MAC subcommittee meetings. The meetings and workshops included:

- (i) The 27th Ordinary Meeting of the Monetary Affairs Committee, held in Juba, South Sudan on 3rd May 2024, which discussed progress made on the implementation of various regional initiatives and challenges faced by the partner states;
- (ii) Technical Assistance Mission and National Training on Financial Soundness Indicators for the United Republic of Tanzania held in Dar es Salaam, Tanzania, from 31st October to 1st November 2024;
- (iii) The Macro-Prudential Analysis, Stress Testing and Statistics Technical Working Group (MASS-TWG) meeting held in Juba, South Sudan from 25th to 29th November 2024, which discussed the implementation status of agreed actions, including undertaking regional financial stability assessment, conducting regional stress testing, reviewing framework for identifying Regional Systemically Important Banks (RSIBs), reviewing the regional financial system stability index framework and conducting a peer review on compliance to 64 convergence criteria;
- (iv) The Crisis Management Technical Working Group (CM-WG) meeting held in Juba, South Sudan from 18th to 22nd November 2024. The meeting discussed guidelines for accessing back-stop funding from the Government, the results of KCB resolvability assessment, and issues related to mobile money protection. The meeting also finalized the Memorandum of Understanding for cross-border crisis management, and reviewed the implementation status of agreed actions;

and

(v) The Regional Technical Working Group session on the compilation of Financial Soundness Indicators (FSIs), held in Entebbe, Uganda, from 17th to 21st June 2024. The session compiled and updated EAC FSIs up to the 1st quarter of 2024, developed FSIs statistical metadata, and assessed the progress of implementation of the EAC FSIs Guidelines.

4.2.2 Committee of Central Bank Governors

The Committee of Central Bank Governors (CCBG), specifically the Banking Supervision Subcommittee, met to deliberate various issues relating to the financial sector. The CCBG is responsible for promoting the development of financial institutions and markets through cooperation and consensus on financial, investment, foreign exchange policies and financial stability matters. During the year, the Bank participated in the Banking Supervision and Financial Stability Subcommittee of CCBG held in July 2024, in Zimbabwe to discuss and deliberate on matters related to strengthening financial stability, financial inclusion and financial supervision in the SADC region.

4.2.3 The Eastern and Southern Africa Anti- Money Laundering Group

The Eastern and Southern Africa Anti-Money Laundering Group (ESAAMLG) is among the nine regional Financial Action Task Force (FATF) bodies that form part of the FATF global network. The purpose of ESAAMLG is to combat money laundering and counter financing of terrorism by implementing the FATF recommendations. This includes, coordinating withother international organizations concerned with combating money laundering, studying emerging regional typologies, developing institutional and human resource capacities and coordinating technical assistance. During the period, the Bank of Tanzania participated in the 47th ESAAMLG Task Force of Senior Officials Meeting, held in Lubango, Huila, Angola, from 5th to 12th April 2024. The meeting discussed, among others, post evaluation follow-up reports for evaluated countries reporting progress and those requesting re-ratings. It also reviewed progress on typologies projects discussed and adopted the concluded Mutual Evaluation Report of the Republic of Rwanda.

4.2.4 Committee of Insurance, Securities and Non-Bank Financial Service Regulatory Authorities (CISNA)

The Committee of Insurance, Securities and Non-Bank Financial Service Regulatory Authorities (CISNA) is responsible for the supervision of insurance, securities, and non-banking financial institutions (NBFI) in SADC Member States. CISNA is part of the Directorate of Finance, Investment and Customs of the SADC Secretariat and reports to the SADC Committee of Ministers of Finance and Investment through the Committee of Senior Treasury Officials. The main mandate of CISNA is to ensure that the non-bank financial services regulatory frameworks within SADC member states are harmonized and comply with best international practices, standards and principles as set by the relevant international standard setting bodies. The Bank of Tanzania became a member of CISNA in 2023. During the year 2024, the Bank of Tanzania in collaboration with Capital Markets and Securities Authority (CMSA) and Tanzania Insurance Regulatory Authority (TIRA) co-hosted the 47th Annual General Meeting of CISNA held in Zanzibar, Tanzania from 29th September to 4th October 2024.

4.2.5 Africa Pension Supervisors Association

Bank of Tanzania became a plenary member of the Africa Pension Supervisors Association (APSA) effective from 20th May 2024. The membership in APSA is a continuation of the Bank of Tanzania's commitment to address challenges relating to pension fund management and bolstering the development of the subsector.

In July 2024, the Bank participated in the Annual General Meeting and the 5th Annual Conference of APSA in Livingstone, Zambia. The conference served as a platform to review progress in advancing Africa's pension systems towards ensuring a dignified retirement for all workers across the continent.

4.3 International Cooperation

The Bank of Tanzania is a member of the Alliance for Financial Inclusion (AFI); and Islamic Financial Services Board (IFSB). During the year, the Bank participated in various for organized by AFI, focusing on supervision, financial stability, and financial inclusion matters. Additionally, the Bank received technical assistance from the World Bank in areas related to implementation of Basel II and III frameworks, as well as the

management of Climate-related financial risks in the Banking Sector.

4.3.1 Alliance for Financial Inclusion

The Alliance for Financial Inclusion (AFI) is a member-owned policy leadership alliance comprising central banks and financial regulatory institutions committed to advancing financial inclusion at the national, regional and global levels. At a regional level, the African Financial Inclusion Policy Initiative (AfPI) has been established to support the development financial inclusion policies, regulatory frameworks, and policy guidelines tailored to the African context.

In 2024, the Bank participated in the AFI's Global Policy Forum with the theme "Innovation for an Inclusive World". The Forum discussed the intersection of financial stability, sustainability, and inclusion within the context of a rapidly evolving global socioeconomic, geopolitical and environmental landscape. Participants explored innovative approaches to expand access to and usage of a broad range of high-quality formal financial products and services, drawing lessons from diverse case studies shared across the global AFI network.

4.3.2 Islamic Financial Services Board

Islamic Financial Services Board (IFSB) serves as an international standard-setting body of regulatory and supervisory agencies that have vested interest in ensuring the soundness and stability of the Islamic financial services industry. The IFSB promotes the development of a prudent and transparent Islamic financial services industry by introducing new or adapting existing international standards consistent with Shariah principles and recommending them for adoption. The work of the IFSB complements that of the Basel Committee on Banking Supervision. The Bank of Tanzania became an Associate Member of IFSB in 2016. The Bank of Tanzania became an Associate Member of IFSB in 2016. During the year 2024, the Bank participated in the IFSB Annual General Meeting, in Djibouti city, Djibouti, from 1st to 3rd July 2024.

4.4 Supervisory Colleges

The expansion of banks' cross-border activities necessitates close cooperation and information sharing among supervisors to ensure effective oversight. This is partly

achieved through supervisory colleges which are meetings organized by groups of supervisors to enhance consolidated supervision of banking groups. These colleges facilitate the sharing of group risk assessment, financial condition, and major supervisory concerns, thereby enabling both home and host supervisors to supervise banks effectively.

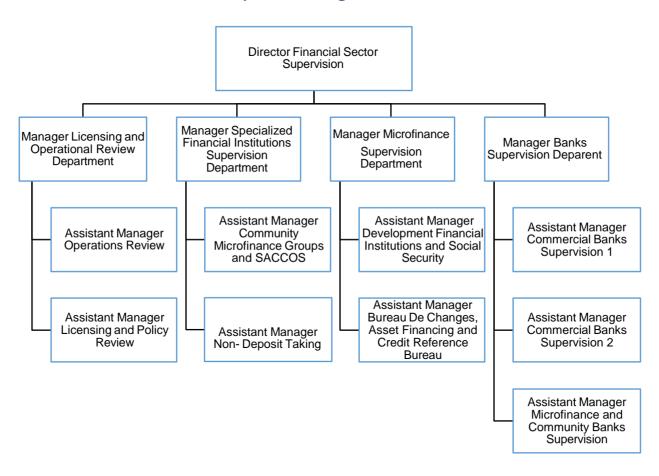

Participation in supervisory colleges continues to strengthen the Bank's understanding of the risks faced by cross-border banking groups, supporting more effective supervision. In 2024, the Bank participated in three Supervisory Colleges as outlined in **Table 4.1** below.

Table 4.1: Supervisory Colleges attended by the Bank of Tanzania
