1.0 Global Economic Situation

The global economic environment is improving, albeit remaining somewhat weak due to the effects of the war in Ukraine and monetary policy tightening cycle to limit inflationary pressures. Growth is expected to increase to 3 percent in 2023, faster than 2.8 percent earlier projected.¹ Commodity prices in the world market have thus far been lower than in 2022, with crude oil price projected to average USD 80 per barrel.² Inflation has been falling and is projected to average 6.8 percent compared to 8.7 percent.³ In advanced economies, inflation has been falling, reaching close to the target of 2 percent. Owing to this inflation trend, the central banks have recently reduced aggressiveness of monetary tightening. Furthermore, concerns on banking instability in the US and Europe have faded away following liquidity support and takeovers of the failed banks. This global landscape is expected to improve economic conditions in Tanzania, particularly the imbalance in the current account, which has contributed to shortage of foreign exchange and exerted pressure on the exchange rate. The balance of risk to the Tanzania economy is largely leaning towards the effects of the ongoing war in Ukraine.

2.0 Domestic Economic Performance

2.1 Inflation

Twelve-month headline inflation sustained an easing trend for six months in a row, reaching 3.3 percent in July 2023 from 4.9 percent (Chart 2.1.1). This trend was driven by food inflation, which declined at the back of an increase in food supply from seasonal harvest in the country (Table 2.1.1). In addition, the decrease in commodity prices in the world market contributed to the downward trend of inflation. The inflation outturn was in line with the country target,

as well as the East African Community and Southern African Development Community convergence criteria (Chart 2.1.2). Inflation is projected to remain within target in the coming months owing to a sufficient food supply in the country and the expected further easing of global consumer goods prices, as well as continued moderation of prices in the world market. These factors are expected to outweigh the impact of the depreciation of the exchange rate on inflation that may befall.

For almost ten months up to July 2023, food inflation, particularly of the unprocessed food, was the main driver of overall inflation trend (Chart 2.1.3). For four consecutive months, this component trended downward, reaching 6.1 percent in July 2023 from 9.7 percent, thus contributing the decline of headline inflation. On a monthly basis, all primary food crops experienced price moderation, with the exception of sorghum, reflecting an improvement in the food supply from harvests in most parts of the country.⁴

In July 2023, food stocks held by the National Food Reserve Agency more than doubled to 94,088 tonnes from the previous months (Table 2.1.3). The Agency supplied 939.8 tonnes of food to councils in Arusha, Shinyanga and Songea; and bought 48,362.5 tonnes of food. The food purchased included 44,079.8 tonnes of maize, 4,007 tonnes of rice and 275.8 tonnes of sorghum.

⁴ Primary food crops are maize, rice, beans, sorghum, round potatoes and finger millet.

Consistent with the fall of energy prices in the world market, domestic energy inflation declined further, specifically for items under the fuel sub-group. The trend was also observed in domestic fuel prices, which were lower compared with July 2022 (Chart 2.1.5). Core inflation, which excludes volatile components such as food and energy items, though it remained lower than the rate recorded in July 2022, rose after a ten-month period of slowdown. In July 2023, core inflation increased to 2.1 percent from 1.7 percent in the previous month.

Note: White products stands denotes average world market oil prices

2.2 Money and Credit

Money supply growth sustained an upward movement, growing at 20.9 percent in the year ending July 2023, higher than 7.9 percent in the corresponding period in 2022 (Chart 2.2.1 and Table 2.2.1). This strong growth was largely attributed to a robust expansion of credit to the private sector.

Note: "—" denotes a change that exceeds 100 percent; and o/w, of which

Credit to the private sector remained strong, largely backed by higher demand for loans that is associated with improving business and investment environment. On annual basis, credit to the private sector grew at 20.8 percent in July 2023, almost the same as the rate registered in the preceding month and in the corresponding period in 2022 (Table 2.2.1 and Chart 2.2.2).

Agricultural activities continued to record the highest growth of credit at 46.4 percent, followed by building and construction at 26.1 percent (Table 2.2.2). Meanwhile, personal loans, which accounted for

the major share of the total outstanding credit to the private sector, remained the main driver of private sector credit growth, followed by trade, agriculture and manufacturing activities (Chart 2.2.3 and 2.2.4).⁵

2.3 Interest Rates

Interest rates charged by banks on loans recorded mixed movements in July 2023. Overall lending rates slightly decreased to an average of 15.56 percent from 16.02 percent in the preceding month, while negotiated lending rates averaged 13.19 percent from 13.11 percent. Meanwhile, overall time deposit rate averaged 6.86 percent compared with 7.08 percent in June 2023, while negotiated deposit rates rose to an average of 9.08 percent from 8.82 percent recorded in the preceding month. The spread between one-year interest rates narrowed further to 7.52 percentage points from 8.42 percentage points in June 2023.

Table 2.3.1: Lending and Deposit Interest Rates

	Percent						
	Jul-22	Sep-22	Dec-22	Mar-23	Apr-23	Jun-23	Jul-23

2.4 Financial Markets

Government Securities Market

In July 2023, the government securities auctions registered a mixed performance, with investors maintaining preferences for securities with longer tenures. The Bank of Tanzania conducted two Treasury bills auctions with a tender size of TZS 344.7 billion for government financing needs and liquidity management. Both auctions were oversubscribed,

⁵ Personal loans are mostly utilized for personal small and medium enterprises.

attracting bids amounting to TZS 425.3 billion, of which TZS 291.3 billion were successful. The weighted average yield increased to 6.56 percent from 6.48 percent in the preceding month (Chart 2.4.1).

Chart 2.4.1: Performance in Treasury Bills Market

Source: Bank of Tanzania

Note: LHS denotes left hand scale; RHS, right hand scale; and WAY, weighted average yield

The Bank of Tanzania also conducted 2- and 10-year Treasury bond auctions for government budgetary financing, with a combined tender size of TZS 262 billion. The total bids received amounted to TZS 240.5 billion and the Bank accepted bids worth TZS 217.7 billion. Weighted average yields to maturity for the 2- and 10-year Treasury bonds were 9.53 percent and 11.31 percent, respectively, slightly higher than rates registered in the preceding auctions.

Interbank Cash Market

The interbank cash market (IBCM) successfully facilitated the re-distribution of shilling liquidity in the banking system. In July 2023, total transactions in the IBCM amounted to TZS 2,757.2 billion, compared with TZS 2,932.1 billion in the preceding month (Chart 2.4.2). Transactions of 2-7 days remained dominant, accounting for 80.1 percent of the total market turnover. The overall IBCM and 2-7 days' interest rates eased slightly to 5.13 percent and 5.06 percent from 5.25 percent and 5.28 percent registered in the previous month, respectively. Meanwhile, the overnight interest rate averaged 3.94 percent, compared with 3.92 percent in the preceding month.

Chart 2.4.2: Interbank Cash Market Transactions

Source: Bank of Tanzania

Note: LHS denotes left hand scale; and RHS, right hand scale

Repurchase Agreements

As part of the arrays of monetary policy instruments for implementation of the less accommodative monetary policy stance, which aims at balancing between growth and inflation at the current global environment, the Bank of Tanzania conducted repurchase agreements (repo) worth TZS 220 billion in July 2023. Repo rate averaged 2.70 percent compared with 2.80 percent in the preceding month (Chart 2.4.3).

Chart 2.4.3: Repurchase Agreements Transactions

Source: Bank of Tanzania

Note: LHS denotes left hand scale; and RHS, right hand scale

Foreign Exchange Market

In facilitating foreign currency transactions with the rest of the world, the market turnover in the interbank foreign exchange market (IFEM) was USD 52.1 million in July 2023 compared with USD 65.9 million in June 2023, of which about 90 percent was sold by the Bank of Tanzania to address the shortage of foreign currency observed. In the retail market, foreign currency sold amounted to USD 467.23

million, while purchases were USD 400.74 million. Consistent with high demand for foreign currency, the shilling traded at TZS 2,365.38 per US dollar in the IFEM compared with TZS 2,334.30 per US dollar in the preceding month, equivalent to a monthly depreciation of around 1.3 percent and an annual depreciation of 2.1 percent (Chart 2.4.3). This represents a much more exchange rate flexibility in helping to reduce the imbalance in the current account compared to 0.2 percent in the year ending July 2022.

Chart 2.4.4: Developments in the IFEM

Source: Bank of Tanzania

Note: LHS denotes left hand scale; and RHS, right hand scale

2.5 Government Budgetary Operations

Domestic revenue collection in July 2023 was satisfactory, despite global economic shocks and its spillover effects. Total domestic revenue - central and local government authorities collections- amounted to TZS 2,072.1 billion, being 91.9 percent of the target and a growth of 11.7 percent from collections in July 2022. Central government revenue amounted to TZS 1,981.4 billion, of which tax revenue was TZS 1,674 billion, being 94.3 percent of the target, and the remainder being non tax revenue collections.

Chart 2.5.1: Central Government Revenue in July
Billions of TZS

Source: Ministry of Finance and Planning, and Bank of Tanzania computations

Total government expenditure for the month under review amounted to TZS 2,462 billion, of which TZS 1,588.9 billion and TZS 873 billion was recurrent and development expenditure, respectively (Chart 2.5.2). Locally financed development expenditure accounted for TZS 797.9 billion, which is 91.4 percent of the total development expenditure.

Chart 2.5.2: Central Government Expenditure in July
Billions of TZS

Source: Ministry of Finance and Planning, and Bank of Tanzania computations

2.6 Debt Developments

As at the end of July 2023, the national debt stock, comprising public (domestic and external) and private external debt, was USD 42,494.7 million, a decrease of USD 186.2 million in comparison to the previous month. External debt constituted 71.9 percent of the overall debt.

External Debt

External debt stock (public and private) was USD 30,533.1 million at the end of July 2023, an increase of USD 280.4 million from the preceding month. The increase was mainly attributed to disbursements that outweighed debt service. Total external debt service payments during July 2023 amounted to USD 6.5 million (Table 2.6.1).

Table 2.6.1: External Debt Stock by Borrowers

Borrower	Jul-22		Jun-23 ^r		Jul-23 ^p

Note: DOD denotes disbursed outstanding debt; r, revised data; p, provisional data; and TANESCO, ATCL, TRC, TPA, TFC and DAWASA have no outstanding external debt

The external debt stock composition by creditor remained the same as in the previous month and corresponding month in 2022, with debt owed to multilateral institutions accounting for the largest share, followed by commercial creditors (Table 2.6.2). Much of the disbursed outstanding debt was allocated to transportation and telecommunications economic activities, followed by social welfare and education, and energy and mining (Table 2.6.3). The currency composition of external debt remained consistent with the previous month, with the US Dollar dominating at 67.7 percent, followed by the Euro (Table 2.6.4).

Domestic Debt

The domestic public debt stock reached TZS 28,506.2 billion at the end of July 2023, a monthly decrease of TZS 420.9 billion. The decrease was partly due to lower utilization of the overdraft facility (Chart 2.6.1). Treasury bonds continued to dominate the domestic debt portfolio, accounting for 78.2 percent. In terms of creditors, pension funds held the largest share, followed by commercial banks (Table 2.6.5 and Table 2.6.6).

In July 2023, Treasury securities worth TZS 410.2 billion were issued for budgetary financing purposes, of which TZS 225.5 billion were Treasury bonds and the balance was Treasury bills (Chart 2.6.2). Domestic debt service payments totalled TZS 505.3 billion, with TZS 320.4 billion being principal repayments and the balance being interest payments.

Chart 2.6.2: Issued Government Securities for Financing Purposes

The domestic debt stock of selected state-owned enterprises (SOEs) was TZS 25.1 billion at the end of July 2023, a monthly decrease of TZS 5.1 billion primarily attributable to debt servicing. The Tanzania Fertilizer Company continued to account for the largest share of the SOEs domestic debt stock, at 81.4 percent (Table 2.6.7).

2.7 External Sector Performance

The external sector of the economy continues to experience the adverse effects of the global shocks: lingering effects of the COVID-19 pandemic, supply-chain disruption caused by the war in Ukraine, climate change effect, and monetary policy tightening through interest rate hikes in advanced economies. The shocks have led to the widening of the current account deficit following a significant increase in import bills. In the year ending July 2023, the current account deficit widened to USD 4,441 million from a deficit of USD 3,770.7 million in the year ending July

2022, as imports increased faster than exports (Table 2.7.1). Nonetheless, the current account position is expected to improve owing to the downward trend of commodity prices in the world market observed since December last year, lessening of aggressiveness of monetary policy tightening in advanced economies in the recent months, and measures adopted in the country to address the imbalance in the current account. In addition, seasonal earnings from tourism activities and the export of traditional crops are expected to improve the current account position.

Foreign exchange reserves remained adequate, mainly driven by external loans and grants received by the Government, as foreign exchange inflows from exports were fully absorbed by rising import bill. The reserves amounted to USD 5,246.7 million at the end of July 2023, slightly below the level reached at the end of July 2022, on account of sale in the interbank foreign exchange market to support importation of goods and services (Chart 2.7.1). The reserves were sufficient to cover about 4.7 months of projected imports, which were consistent with the country and EAC benchmarks of at least 4 and 4.5 months, respectively.

Exports

Goods and services worth USD 12,991.9 million were exported during the year ending July 2023, higher than USD 12,218.2 million in the corresponding period in 2022, driven by services receipts and non-traditional goods exports, in particular minerals (Table 2.7.2).

Services receipts increased to USD 5,495.2 million in the year to July 2023 from USD 4,125 million in the year ending July 2022, driven by travel (tourism) and transportation receipts (Table 2.7.2 and Chart 2.7.1). The increase in travel receipts reflects recovery of the tourism sector, as tourist arrivals rose by 37.2 percent to 1,658,043 during the year—the highest level ever recorded. On monthly basis, services receipts were USD 579.1 million in July 2023, compared with USD 481.9 million in July 2022.

Exports of non-traditional goods recorded a growth of 6.1 percent, largely on account of minerals, particularly gold, coal, and diamonds, and manufactured goods (Table 2.7.2 and Chart 2.7.3). Coal exports increased to USD 220.7 million in the year to July 2023 from USD 67.3 million a year earlier, owing to growing demand in the wake of supply shortages, following the war in Ukraine. Exports of diamonds almost doubled to USD 46.8 million from USD 29.2 million in the year ending July 2022 due to price effect. As for gold exports, the rise was largely due to the volume effect. Manufactured goods exports also recorded notable growth, largely

steered by fertilizers, cement, and glassware (Chart 2.7.2).

Traditional goods exports also increased to USD 782.6 million from USD 750.6 million, with all traditional goods recording increases except cloves and cashew nuts. On monthly basis, traditional goods worth USD 66.5 million were exported in July 2023 compared with USD 36.2 million in a similar month in 2022, while non-traditional exports increased to USD 634.6 million from USD 546.6 million.

Imports

Imports of goods and services increased to USD 16,796.5 million in the year ending July 2023 from USD 14,298 million in the previous year. The main drivers of the rise include machinery, white petroleum products, industrial transport equipment, fertilizers and service payments, particularly freight payments (Table 2.7.3). Import of white petroleum products, which accounted for 20.9 percent of the total imports bill, increased by 12.5 percent, owing to price effects. On monthly basis, goods worth USD 1,090.7 million were imported in July 2023, higher than USD 1,044.1 million in July 2022.

Services payments also rose to USD 2,496.5 million from USD 2,080.5 million in the year to July 2022, largely driven by freight payments consistent with the rising import bill (Chart 2.7.4). On a monthly basis, service payments were USD 173 million in July 2023, compared with USD 213.9 million in July 2022.

Chart 2.7.4: Service Payments

Source: Banks and Bank of Tanzania computations

Note: Other services include construction, insurance, financial, telecommunication, computer and information, government, personal and other business services

During the year to July 2023, the primary income account balance recorded a deficit of USD 1,284.4 million, higher than a deficit of USD 1,260.8 million a year before. On a monthly basis, the account recorded a deficit of USD 110.4 million, compared with a deficit of USD 96 million in July 2022.

The secondary income account balance improved to a surplus of USD 648.1 million in the year to July 2023 from a surplus of USD 580.4 million in

the corresponding period in 2022, explained by the improvement in personal transfers. On a monthly basis, the secondary income account had a surplus balance of USD 52.2 million in July 2023, lower than USD 55.3 million in July 2022.

World Commodity Prices

In July 2023, commodity prices recorded mixed movements. Prices of crude oil edged up to USD 78.98 per barrel from USD 73.26 per barrel in June 2023, primarily due to an increase in demand attributed to the depreciation of the US dollar, coupled with persistent supply cuts from OPEC+ countries that is expected to extend throughout the year. Similarly, gold prices rebounded to USD 1,951.02 per troy ounce from USD 1,942.9 per troy ounce in June 2023, buoyed by increased demand following the depreciation of the US dollar on expectations of the Federal Reserve's lessening of interest rate hikes. Meanwhile, the price of maize fell due to increased seasonal supply, while that of rice edged up due to low supply mostly following India's rice export ban to moderate domestic prices.⁶ Prices of edible oil also increased following expiration of Black Sea export deal, coupled with concerns over low output prospects in leading producing countries.

3.0 Economic Performance in Zanzibar

3.1 Inflation

Annual headline inflation was 6.7 percent in July 2023, compared with 6.5 percent in the preceding month and 4.5 percent in the corresponding period in 2022. This performance was mainly associated with increase in food inflation to 11.8 percent from 10.7 percent and 4 percent recorded in June 2023 and July 2022, respectively. Despite the increase, inflation was still within the EAC and SADC convergence criteria of a maximum of 8 percent, and between 3-7 percent, respectively. Non-food inflation eased to 3.2 percent in July 2023 from 4 percent in the corresponding period in 2022. On a monthly

⁶ India is one of the top five producers of rice in the world.

basis, headline inflation was 0.6 percent compared with 0.2 percent in June 2023 and 0.4 percent in July 2022 (Table 3.1.1 and Chart 3.1.1).

3.2 Government Budgetary Operations

In July 2023, the Government realized domestic revenue and grants amounting to TZS 93.5 billion, of which domestic revenue was TZS 90.6 billion. Of the domestic revenue, tax revenue was TZS 77.9 billion, equivalent to 93.4 percent of the target for the month and the balance of TZS 12.7 billion was non-tax revenue, which was above the target by 7.5 percent. All tax categories performed below the target, except VAT and excise duties (local), which was above the target by 6.1 percent (Chart 3.2.1).

Chart 3.2.1: Government Resources

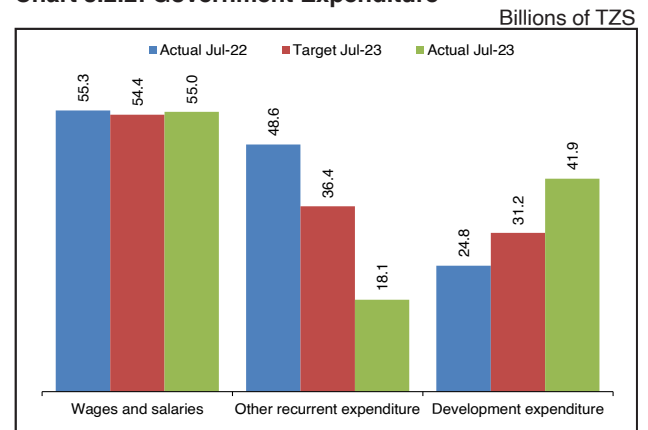

Source: President's Office, Finance and Planning, Zanzibar

Note: Other taxes include hotel and restaurant levies, tour operator levy, revenue stamps, airport and seaport service charges, road development fund and petroleum levy

With regard to expenditure, the Government spent a total of TZS 114.9 billion in July 2023, of which recurrent expenditure was TZS 73.1 billion, and development expenditure was TZS 41.9 billion. Local financing of development expenditure was TZS 25.8 billion, while the remaining TZS 16.1 billion was from external sources (Chart 3.2.2). Government budgetary operations realized an overall deficit of TZS 11.7 billion, which was financed through external borrowing.

3.3 External Sector Performance

Current Account

Current account registered a deficit of USD 416.5 million during the year ending July 2023, compared with a deficit of USD 284 million, in the corresponding period in 2022. This development was largely, associated with an increase in import bills (Table 3.3.1).

Exports

Exports of goods and services grew by 13 percent to USD 205.2 million in the year ending July 2023 from the value recorded in the corresponding period in 2022, owing to an increase in service receipt in particular tourism-related activities. Services receipt particularly tourism rose by 51.1 percent to USD 139 million, following an increase in tourist arrivals (Table 3.3.1 and Table 3.3.2). Meanwhile, goods exports declined largely on account of cloves that accounted for about 64 percent of goods exports. Cloves export decline to USD 42.7 million from USD 62.8 million in the year ending July 2022 due to cyclical nature of the crop. On monthly basis, goods and services worth USD 13.7 million were exported in July 2023 compared with USD 14.6 million in July 2022.

Note: Other exports mainly include souvenirs and spices; and p denotes provisional data

Imports

Imports of goods and services, rose to USD 633.4 million in the year to July 2023 from USD 478.3 million in the corresponding period in 2022, with both goods imports and services payments recording increases (Table 3.3.1). All major categories of goods imports increased. As for capital goods, the increase was largely associated with ongoing infrastructure developments and construction activities, while that of intermediated goods was mainly driven by high prices of fuel in the global market (Table 3.3.3). On a monthly basis, imports of goods (f.o.b) and services amounted to USD 69.8 million in July 2023, compared with USD 37 million in July 2022.

Note: Data for actual debt service and disbursement is revised from July 2021. Multilateral arrears are those owed by the private sector. 1 denotes debt flows during the period and 2 denotes stock position at the end of period.

¹ Debt position is revised. ² Debt position is provisional.

Glossary

Broad money (M2)

A definition of money that comprises narrow money (M1) plus domestic currency time and savings deposits of residents with banks in the country.

Currency in circulation outside banks

Notes and coins of Tanzanian shillings circulating outside the banking system, i.e. outside the Bank of Tanzania and other depository corporations.

Core inflation

This measures the rate of change in prices of goods and services other than energy, utilities and unprocessed food, over a specified period of time. The unprocessed food items, energy and utilities are excluded since they are volatile and hence may be affected by non-monetary events, which do not constitute the underlying monetary inflation.

Disbursed outstanding debt

This is the amount of debt that has been disbursed but is yet to be paid back or forgiven.

Discount rate

The rate of interest that the Bank of Tanzania charges on loans it extends to banks. It uses Treasury bills rate as a base plus a loaded factor, which can be changed from time to time depending on the liquidity situation in the market.

Exchange rate

The price at which one unit of a currency can be purchased with another currency, for instance TZS per US dollar.

Extended broad money (M3)

A definition of money that consists of broad money (M2) plus foreign currency deposits of residents with banks in the country.

External debt stock

The stock of a country's debt that is borrowed from foreign lenders through private commercial banks, foreign governments, or international financial

institutions. It is the sum of public, publicly guaranteed, and private non-guaranteed long-term debt, use of IMF credit, and short-term debt, which includes all debt having an original maturity of one year or less and interest in arrears on long-term debt.

Food inflation

This is a measure of the rate of change in the price of food both processed and unprocessed.

Gross official reserves

Gross official reserves consist of external assets that are readily available to and controlled by the Bank of Tanzania for direct financing of balance of payments, and for indirectly regulating the magnitude of balance of payments imbalances through intervention in foreign exchange markets. Gross official reserves comprise the Bank of Tanzania's holdings of monetary gold, Special Drawing Rights (SDRs), reserve position in the International Monetary Fund, and foreign exchange resources, available to the Bank of Tanzania for meeting external financing needs.

Inflation

The rate at which the average level of prices of a basket of selected goods and services in an economy is increasing over a period of time. It is often expressed as a percentage. Inflation indicates a decrease in the purchasing power of a nation's currency.

Interbank cash market

A money market in which banks extend loans to one another for a specified term of not more than 90 days. Each transaction represents an agreement between the banks to exchange the agreed amounts of currency at the specified rate on a fixed date.

Lombard facility

An overnight facility was established to enable banks to borrow from the Bank of Tanzania at their own discretion, by pledging eligible government securities as collateral.

Lombard rate

The rate the Bank of Tanzania charges a bank for borrowing through the use of a Lombard Facility. This rate is computed based on the prevailing weighted average yield of 35-day T-bill, repo or overnight inter-bank rate, whichever is higher in the market plus a margin.

Money supply

The sum of currency circulating outside the banking system and deposits of residents with banks defined in various levels of aggregation. In Tanzania, three aggregates of money supply are compiled and reported, namely; narrow money (M1), broad money (M2), and extended broad money (M3).

Non-food inflation

This is a measure of price movements caused by factors other than food prices.

Narrow money (M1)

Consists of currency in circulation outside banking system plus demand deposits (cheque account) of residents with banks in the country.

National debt

Total national debt obligations that include public debt and private sector external debt.

Public debt

Debt payable or guaranteed by the Government. Tanzania's public debt has two main components, domestic debt (which is incurred principally to finance fiscal deficit) and external debt (which is raised primarily to finance development projects). It comprises the debt central government owes to foreign creditors and external obligations of government departments and agencies that are guaranteed for repayment by the Government).

Primary income account

It comprises income from compensation of employees, interest income, dividends and retained earnings from capital investments, rental income from the use of natural resources and other types of primary income including those that relate to insurance policy holders and pension funds.

Secondary income account

It entails transfers between residents and non-residents that correspond to the provision of a good, service, financial asset, or other non-produced asset with no corresponding return of an item of economic value.

Overnight interbank cash market

The component of the money market involving the shortest-term loan. Lenders agree to lend borrowers funds only "overnight" i.e. the borrower must repay the borrowed funds plus interest at the start of business the next day.

Repurchase agreements (repo)

An arrangement involving sale of securities at a specified price with commitment to repurchase the same or similar securities at a fixed price on a specified future date.

Reverse repo

An arrangement involving buying of securities at a specified price with commitment to resale the same or similar securities at a fixed price on a specified future date.

Reserve money (M0)

The Bank of Tanzania's liabilities in the form of currency in circulation outside the banking system, cash held by banks in their vaults and deposits of banks kept with the Bank of Tanzania in national currency. Reserve money is also referred to as base money, or monetary base or high-powered money.

Weighted yields of Treasury bills

This is the average yield of Treasury bills, which is weighted by the volume sold of 35-day, 91-day, 182-day, and 364-day Treasury bills, expressed in percentage per year.
