1.0 Global Economic Situation

The global economy maintained moderate momentum in February 2026, supported by resilient private demand, ongoing investment in technology intensive and infrastructure projects, and gradually easing financial conditions. Across advanced economies, growth remained positive but uneven, supported by expansion in both manufacturing and services, though the overall pace remains below long run averages, with business sentiment remaining cautious.

In emerging economies, activity remained policy supported and investment led, albeit with considerable divergence in performance across regions and sectors. Within Sub-Saharan Africa, the near-term outlook retains a degree of resilience, tempered by tight external financing conditions and rising risk premia linked to the closure of the Strait of Hormuz and its knock-on effects on regional trade and energy flows.

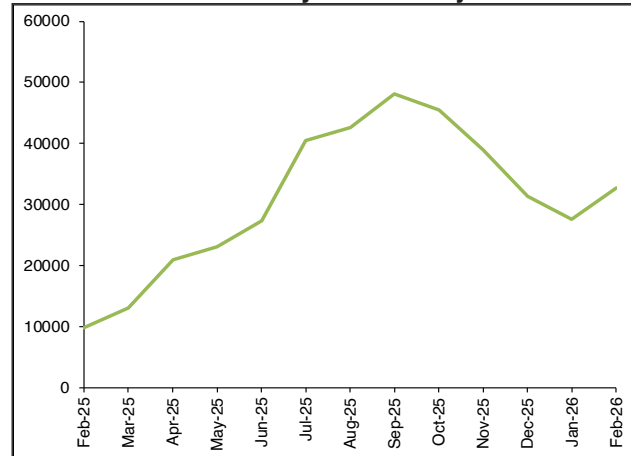

The balance of risks to the global outlook remains tilted to the downside. Persistent trade-policy frictions and elevated geopolitical uncertainty continue to cloud the near-term growth trajectory, as reflected in disruptions to global supply chains, rising freight costs, and elevated energy prices (Charts 1.1a and 1.1b).

Chart 1.1a: Global Economic Policy Uncertainty Index

Source: <https://worlduncertaintyindex.com/>

Chart 1.1b: Trade Policy Uncertainty Index

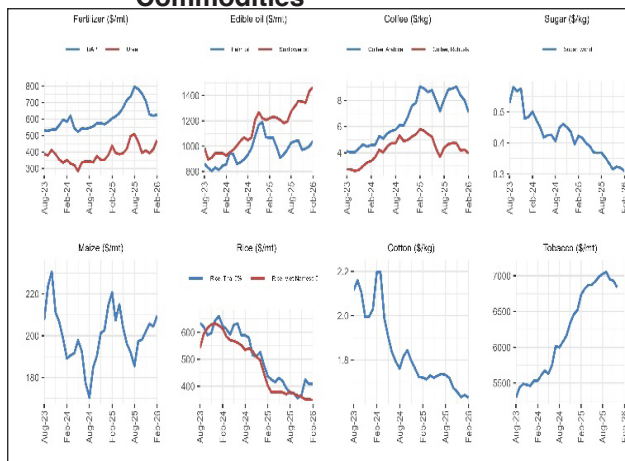

Source: <https://www.policyuncertainty.com/trade>

In February 2026, commodity markets displayed divergent trends across product classes, reflecting heterogeneous supply-demand fundamentals and heightened risk sentiment. Gold prices rose by 5.6 percent month-on-month, driven by intensified safe-haven demand amid escalating tensions in the Middle East and sustained central bank accumulation. Coffee and cocoa prices declined as supply concerns eased, while edible oils strengthened, with palm oil prices rising by 3.7 percent month-on-month, on account of seasonal constraints in Southeast Asia and improved global demand. Grain prices increased, with wheat prices rising by 3.1 percent following weather-related supply concerns across Europe and the U.S., contrasting with sugar, whose prices fell by 4.1 percent on improved supply prospects. Fertilizer prices rose by 6.5 percent month-on-month, with urea surging by 13.6 percent, reflecting energy-related production pressures and elevated input costs (Chart 1.2 and Appendix Table A8).

Chart 1.2: World Commodity Prices of Select Commodities

Notes: DAP denotes Di-ammonium phosphate

Despite heightened commodity price volatility, global inflation in February 2026 remained generally moderate, and uneven across jurisdictions. In advanced economies, price pressures were relatively contained. In the United States, inflation held steady as a cooling labour market offset higher energy costs. In the euro area, inflation edged up slightly, underpinned by stronger services prices, while in the United Kingdom, inflation eased marginally as the effects of previous monetary tightening continued to transmit to the broader economy.

In emerging economies, inflation outcomes were mixed and largely shaped by country-specific factors. In China, headline CPI recorded a temporary uptick, primarily reflecting seasonal food price increases around the Lunar New Year. In India, inflation edged up slightly amid robust domestic demand and infrastructure related pressures, though it remained within the target range. Across Sub-Saharan Africa, inflation remained broadly favourable. Within the EAC and SADC, most member states held prices within regional convergence benchmarks, buoyed by improved agricultural yields and disciplined monetary policy (Table 1.1, Chart 1.3, Chart 1.4, and Chart 1.5).

Table 1.1: Global Inflation Dynamics and Drivers

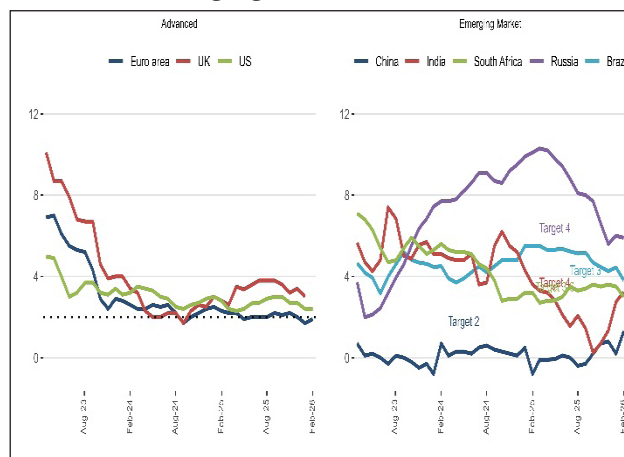

Region/Country	Change		Key driver(s)
	(% Y-on-Y)	Feb-26 vs Jan-26	
United States	2.4	Steady	Labor market cooling (core 2.5 percent) vs. energy +0.5 percent
Euro Area	1.9	Slight up	Services inflation 3.4 percent (vs 3.2 percent in January 2026) led the uptick
China	1.3	Transitory rise	Lunar New Year effects lifted food and services prices
EAC regional average ¹	5.9	Decrease	Broad easing in transport, utilities and services related pressures
SADC regional average ¹	5.9	Decrease	Fuel and transport disinflation and moderating food prices

Source: IMF/OECD and National Statistics Offices

Notes: ¹Unweighted average, computed from Kenya 4.3 percent, Tanzania 3.2 percent, Uganda 2.9 percent, Rwanda 7.9 percent, Burundi 11.4 percent (all Feb-26). This is down from 6.2 percent in Jan 2026

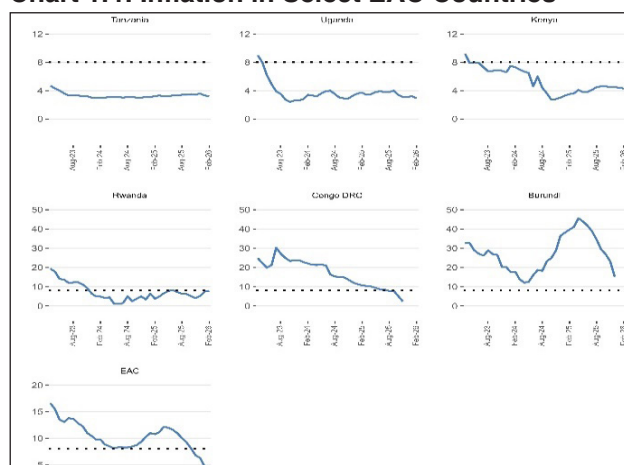

Unweighted average, computed from 12 members with Feb-26 data (Angola 13.4, Botswana 4.0, Lesotho 2.7, Malawi 24.1, Mauritius 3.5, Mozambique 3.2, Namibia 2.4, Seychelles 0.3, South Africa 3.0, Tanzania 3.2, Zambia 7.5, and Zimbabwe 3.8 – all in percent). This is down from the same group's Jan-26 average (6.7 percent)

2.0 Domestic Economic Performance

2.1 Inflation Developments

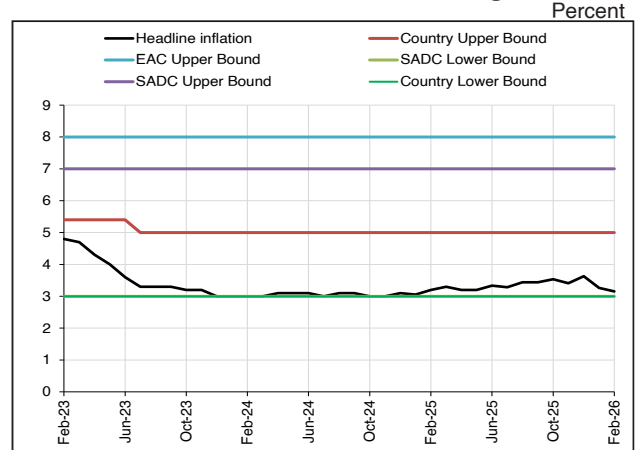

In February 2026, headline inflation stood at 3.2 percent, unchanged from the corresponding period in 2025. The stability reflects a net effect of easing core and energy inflation, that have effectively offset seasonal pressures in food prices. Compared to the previous month, the rate edged slightly lower from the 3.3 percent recorded in January 2026, and remained well-anchored within the national target and compliant with both the SADC and EAC regional benchmarks (Table 2.1.1 and Chart 2.1.1).

Table 2.1.1: Inflation Developments

Main groups	Weight	Base: 2020 = 100

Source: National Bureau of Statistics and Bank of Tanzania computations

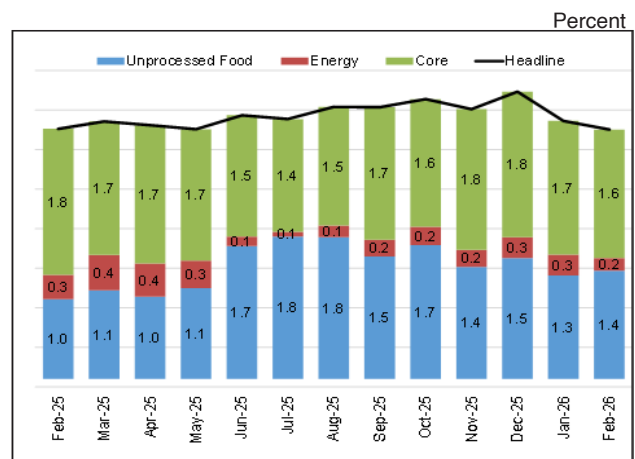

Chart 2.1.1: Headline Inflation and Targets

Source: National Bureau of Statistics and Bank of Tanzania computations

Core inflation remained the main driver of the headline rate in February 2026, contributing 1.6 percentage points, slightly down from the 1.7 percentage points recorded in the previous month. The contribution of unprocessed food rose marginally to 1.4 percentage points from 1.3 percentage points in January 2026, reflecting seasonal supply dynamics. Also, in the review month, the contribution of the energy sub-index remained stable at 0.2 percentage points, consistent with global easing of energy prices during the review period (Chart 2.1.2).

Chart 2.1.2: Contribution to Overall Inflation

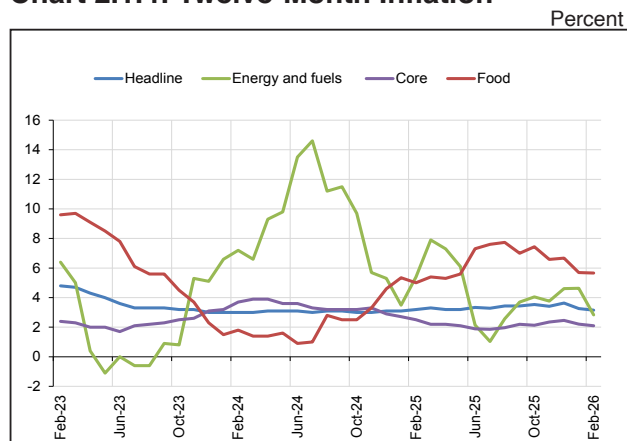

Source: National Bureau of Statistics and Bank of Tanzania Computations

Core inflation, which excludes the more volatile food and energy components, eased to 2.1 percent in February 2026, down from 2.2 percent in the corresponding month of 2025. The deceleration in the core sub-index was primarily

driven by slower increases in prices of non-durable and semi-durable goods, particularly clothing materials, footwear, furnishings, and household equipment, as well as costs associated with routine household maintenance (Chart 2.1.4 and Table 2.1.1).

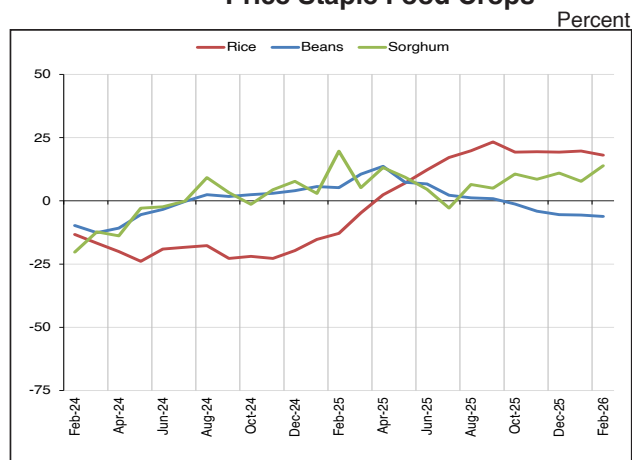

Chart 2.1.4: Twelve-Month Inflation

Source: National Bureau of Statistics and Bank of Tanzania computations

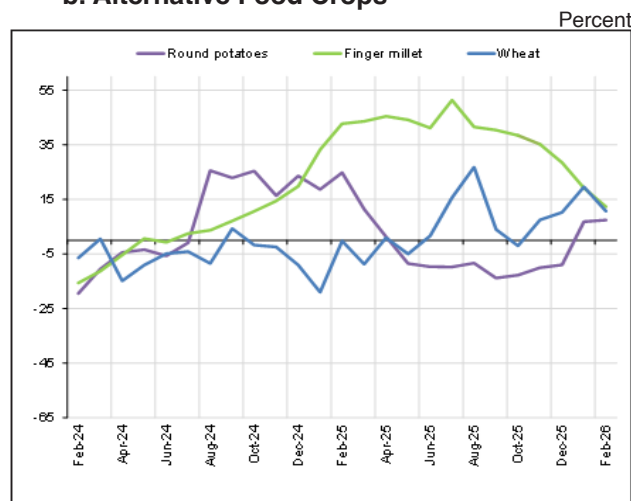

Food inflation was 5.7 percent, unchanged from the preceding month, though it remained elevated compared to the 5.0 percent recorded in the corresponding period in 2025. This reflects a balance between seasonal supply pressures and easing prices of key staples and alternative food crops, specifically beans and finger millet (Chart 2.1.3a and Chart 2.1.3b).

a. Chart 2.1.3: Annual Change in Wholesale Price Staple Food Crops

Source: Ministry of Industries and Trade, and Bank of Tanzania computations

b. Alternative Food Crops

Source: Ministry of Industries and Trade, and Bank of Tanzania computations

Food stocks held by the National Food Reserve Agency (NFRA) reached 560,007.9 tonnes in February 2026, down from 567,469.2 tonnes in the preceding month, following the release of 7,461.3 tonnes of maize and paddy to various traders (Table 2.1.2). While this resulted in a marginal contraction of the reserve, the intervention helped stabilize retail staple prices.

Table 2.1.2: Food Stocks Held by National Food Reserve Agency

Period	Tonnes				
	2022	2023	2024	2025	2026
Jan	207,899	124,736	270,984	646,480	567,469

Source: National Food Reserve Agency

Inflation for energy, fuel, and utilities fell to 2.8 percent in February 2026, from 5.2 percent in the preceding month, and remained well below the 5.4 percent recorded in the corresponding month of 2025 (Table 2.1.1 and Chart 2.1.4). The easing trend was largely driven by stabilization of charcoal and firewood prices. Retail pump prices for petrol, diesel, and kerosene trended downward during the period, mirroring the broader softening of global market prices for

white petroleum products (Chart 2.1.5)

Chart 2.1.5: Monthly Average Retail Prices of Petroleum Products

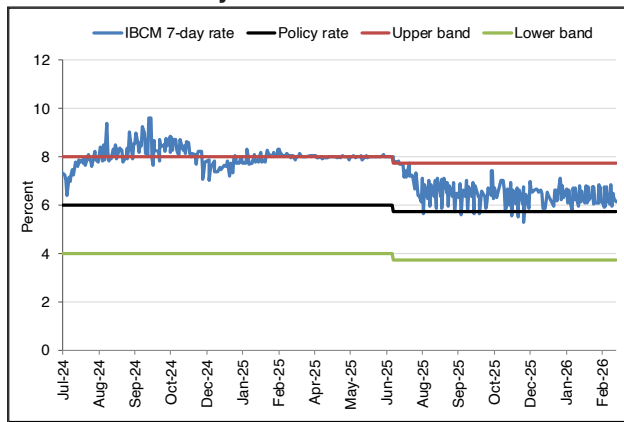

Source: National Bureau of Statistics
Note: White products denote the average world market oil prices

2.2 Monetary Policy

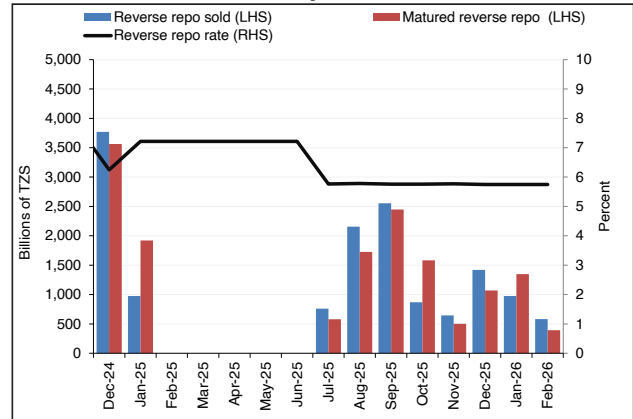

As noted in the previous review, the Monetary Policy Committee (MPC) at its meeting held in January 2026 kept the Central Bank Rate (CBR) at 5.75 percent for the quarter ending March 2026. The implementation of monetary policy in February 2026, therefore, focused on steering the 7-day interbank cash market (IBCM) rate within a ± 2 percentage points range around the CBR. As a result, the 7-day IBCM rate remained closely aligned with the CBR while maintaining adequate shilling liquidity in the banking system (Chart 2.2.1 and Chart 2.2.2).

Chart 2.2.1: 7-Day IBCM Rate and the CBR

Source: Bank of Tanzania

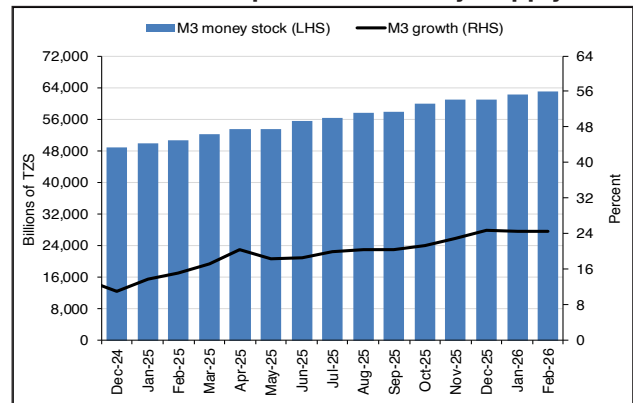

Chart 2.2.2: Reverse Repo Transactions

Source: Bank of Tanzania

Monetary aggregates continued to expand in line with the prevailing monetary policy stance. Extended broad money (M3) recorded annual growth of 24.5 percent, sustaining the momentum observed in January 2026 (Chart 2.2.3 and Table 2.2.1). The performance was primarily driven by the sustained expansion of credit to the private sector, which accelerated to 24.4 percent from 23.5 percent registered in the preceding month (Chart 2.2.4, Chart 2.2.5, and Table 2.2.1).

Source: Bank of Tanzania and banks

Note: LHS denotes left-hand scale, and RHS, right-hand scale

Mining and quarrying recorded the highest growth in private sector credit, expanding by 103.9 percent, a substantial increase from the levels observed in early 2025. The momentum

remained underpinned by strategic government initiatives aimed at modernizing the extractive industry and enhancing financial inclusion for artisanal and small-scale miners through more flexible collateral requirements.

Other major contributors to credit growth included trade activity, which expanded by 48.7 percent, reversing the moderate trends of the previous year, followed by transport and communication, which grew by 39.4 percent (Table 2.2.2). The uptick in trade reflects heightened domestic business activity, while the recovery in credit to agriculture (31.9 percent) was partly driven by the Bank's specialized financing facilities aimed at boosting productivity. In contrast, credit in the manufacturing activity continued to contract, registering a negative growth of 8.5 percent in February 2026. The downward trend is primarily attributed to net repayments of existing loan facilities.

Table 2.2.2: Annual Growth of Credit to Select Economic Activities

	Percent					
	Feb-25	Mar-25	Apr-25	Dec-25	Jan-26	Feb-26
Mining and quarrying	-28.2	-24.8	-10.5	91.1	91.4	103.9
Trade	5.8	12.7	14.4	49.7	50.0	48.7

Source: Banks and Bank of Tanzania

Personal loans, mostly used to finance micro, small, and medium-sized enterprise activities, continued to make the largest share of private sector credit at 35.4 percent, followed by the trade at 14.7 percent and agriculture at 13.7 percent (Chart 2.2.6).

Chart 2.2.6: Share of Credit to Select Economic Activities

Source: Banks and Bank of Tanzania

2.3 Interest Rates

In February 2026, banks' interest rates remained broadly stable. The overall lending rate remained broadly unchanged, at 15.11 percent from 15.10 percent recorded in January 2026. Negotiated lending rates for prime customers fell to 12.19 percent, compared with 12.25 percent in the previous month. On the deposit side, the overall time-deposit rate was 8.32 percent, down from 8.33 percent in January 2026, while negotiated deposit rates declined to 11.48 percent from 11.74 percent. As a result, the short-term interest rate spread, measured as the difference between the one-year lending and deposit rates, narrowed to 5.59 percentage points from 5.79 percentage points in January 2026 (Table 2.3.1).

Table 2.3.1: Lending and Deposit Interest Rates

	Percent					
	Feb-25	Mar-25	Apr-25	Dec-25	Jan-26	Feb-26
Savings deposit rate	2.98	2.86	2.89	3.02	2.94	2.98

2.4 Financial Markets

Government Securities Market

The government securities market was characterized by persistent oversubscription, as stable macroeconomic conditions continued to drive robust investor appetite, particularly for longer-term maturities. The Bank conducted two Treasury bill auctions during the month with a combined tender size of TZS 440.9 billion to meet government budgetary requirements and support monetary policy operations. These auctions attracted strong demand, with total bids reaching TZS 1,061.4 billion, of which TZS 431.1 billion were successful (Chart 2.4.1). Reflecting this strong demand, which saw the tender-to-offer ratio surge, the overall weighted average yield (WAY) declined further to 5.68 percent from 5.89 percent in the preceding month. This consistent yield compression underscores the market's confidence and the prevailing liquid conditions in the banking system.

Chart 2.4.1: Performance in Treasury Bills Auctions

Source: Bank of Tanzania

Note: LHS denotes left-hand scale; and RHS, right-hand scale

The Bank conducted auctions for the 15- and 25-year Treasury bonds, offering a combined tender size of TZS 399.5 billion for government financing. These auctions attracted bids worth TZS 2,778.1 billion, of which TZS 520.2 billion were successful. The weighted average yields to maturity for 15- and 25-year bonds declined to an average of 10.78 percent and 11.99 percent, respectively.

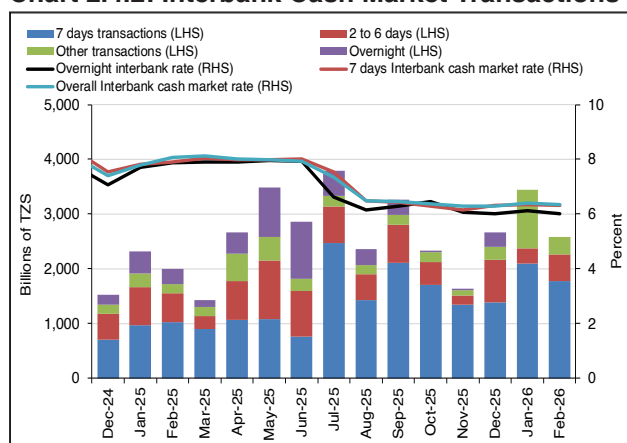

Interbank Cash Market

The interbank cash market (IBCM) continued to facilitate shilling liquidity trading among banks. In February 2026, the total value of transactions decreased to TZS 2,796.5 billion from the TZS 2,868.9 billion in the preceding month (Chart 2.4.2). The market structure was dominated by 7-day transactions, which accounted for 63.5 percent of total activity, indicating a preference for short-term liquidity management over overnight borrowing.

Reflecting the prevailing adequacy of liquidity within the banking system, the overall IBCM interest rate eased to 6.34 percent from 6.40 percent in January 2026. The downward shift in the interbank rate, coupled with the relative stability of the overnight and 7-day rates, demonstrates the effectiveness of the current monetary policy stance in anchoring market rates near the CBR.

Chart 2.4.2: Interbank Cash Market Transactions

Source: Bank of Tanzania
Note: LHS denotes left-hand scale; and RHS, right-hand scale

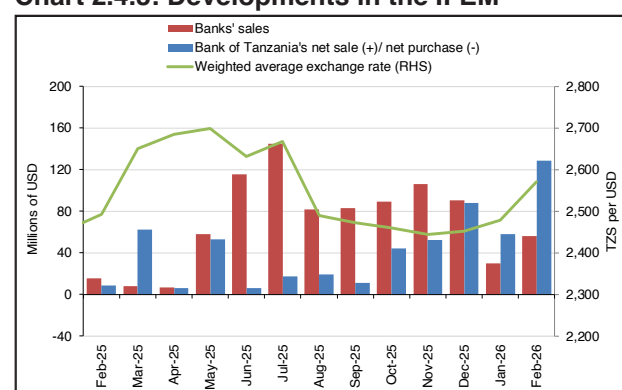

Interbank Foreign Exchange Market

Foreign currency liquidity in the economy continued to improve during the review month, supported by higher inflows from traditional crop exports and the mining sector. Consequently, activity in the Interbank Foreign Exchange Market (IFEM) surged to USD 184.9 million, compared to USD 88.2 million in the preceding month. The rise in market depth was complemented by the Bank's participation to ensure orderly market conditions, resulting in a net sale of USD 128.8 million,

compared with USD 58 million in the preceding month (Chart 2.4.3).

The Tanzanian shilling averaged TZS 2,570.24 per US dollar during the month. When compared to the TZS 2,492.05 recorded in the corresponding month of 2025, this represents a moderate annual depreciation of 3.14 percent. The gradual nature of the exchange rate adjustment, supported by active liquidity management, continues to maintain the shilling's competitiveness while anchoring expectations against the backdrop of rising global oil prices and external logistical pressures.

Chart 2.4.3: Developments in the IFEM

Source: Bank of Tanzania
Note: LHS denotes left-hand scale; and RHS, right-hand scale

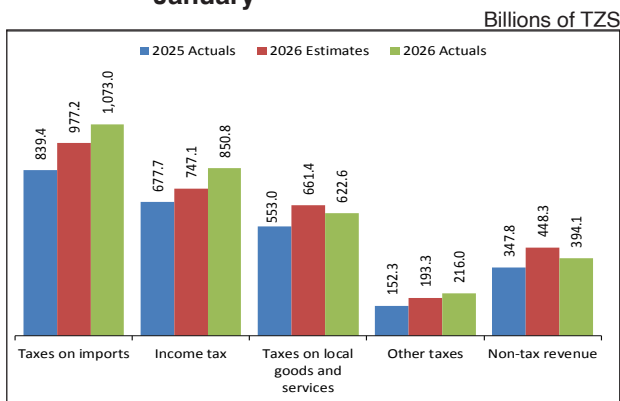

2.5 Government Budgetary Operations

Domestic revenue collections in January 2026 remained robust, amounting to TZS 3,340.2 billion, surpassing the month's target by 5.4 percent. Central Government revenue amounted to TZS 3,156.4 billion, with the remainder from local government collections.

Tax revenue maintained strong performance, reaching TZS 2,762.3 billion—exceeding the monthly target by 7.1 percent. This performance reflected the continued positive effects of strengthened tax administration and improved compliance. Non-tax revenue amounted to TZS 394.1 billion, representing 87.9 percent of the target (Chart 2.5.1).

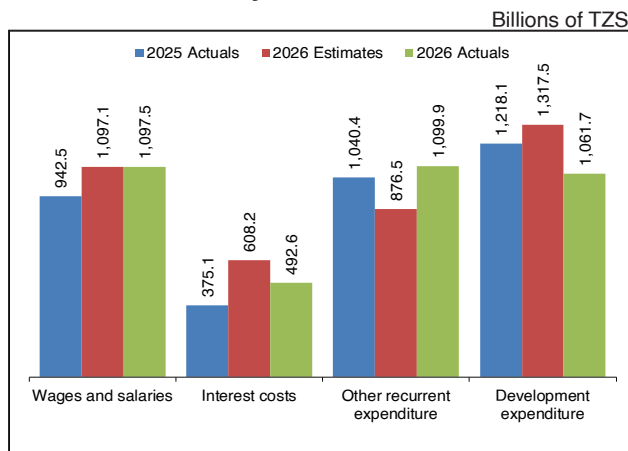

Chart 2.5.1: Central Government Revenue in January

Source: Ministry of Finance and Bank of Tanzania computations
 Note: Actual figures for 2026 are provisional

The Government continued to align its expenditure with available resources, recording total expenditure of TZS 3,751.7 billion. Of this amount, TZS 2,689.9 billion was recurrent expenditure, and the balance (TZS 1,061.8 billion) was allocated to development expenditure (Chart 2.5.2).

Chart 2.5.2: Central Government Expenditure in January

Source: Ministry of Finance and Bank of Tanzania computations
 Note: Actual figures for 2026 are provisional

2.6 Debt Developments

The national debt stock at the end of February 2026 was USD 51,112.8 million, a decrease of 0.2 percent from the stock at the end of the preceding month. Of the debt stock, 70.2 percent was external debt (Appendix, Table A10).

External Debt

The external debt stock (public and private) declined by 0.1 percent to USD 35,859.1 million at the end of February 2026. Of this amount, 82.7

percent was public debt, while the remainder was private sector external debt (Table 2.6.1). External loans disbursed during the month amounted to USD 83.8 million, mainly to the central government. The external debt service payments totalled USD 98.9 million, of which USD 35.4 million was for principal repayments.

The composition of external debt by creditor remained broadly unchanged, with multilateral institutions continuing to account for the largest share of the stock at 57.8 percent, followed by commercial lenders (Table 2.6.2). Balance of Payments (BOP) and budget support activities were the largest holders of the disbursed outstanding debt, followed by transport and telecommunication activities, while the US dollar continued to dominate the currency composition of external debt by 66.0 percent, followed by the Euro (Tables 2.6.3 and Table 2.6.4).

Domestic debt

The stock of domestic debt stood at TZS 38,781.7 billion at the end of February 2026, a monthly increase of 0.5 percent (Chart 2.6.1). The domestic debt portfolio remains concentrated in long-term instruments, particularly Treasury bonds, with commercial banks and pension funds holding 54.9 percent of the total (Tables 2.6.5 and 2.6.6).

In February 2026, the Government mobilized TZS 621.9 billion through the issuance of government securities, of which TZS 450.5 billion was raised from Treasury bonds and TZS 171.4 billion from Treasury bills (Chart 2.6.2). Domestic

debt servicing during the month amounted to TZS 875.2 billion, including TZS 472.2 billion in principal repayments and TZS 403 billion in interest payments.

2.7 External Sector Performance

The external sector remained resilient, characterized by a narrowing of the current account deficit to USD 2,108.2 million for the year ending February 2026, compared to a deficit of USD 2,156.3 million in the corresponding period of 2025 (Table 2.7.1). The modest improvement was supported by improved performance in exports of goods and services, particularly tourism receipts and gold.

In February 2026, the country's gross official reserves stood at USD 6,243.6 million, providing a buffer against external shocks. The level of reserves is sufficient to cover 4.8 months of projected imports of goods and services (Chart 2.7.1). Notably, the position remains comfortably above the national benchmark of 4.0 months and the EAC convergence criteria of 4.5 months, but slightly below the SADC benchmark of 6.0 months (Chart 2.7.1).

Exports

Exports of goods and services rose by 12.4 percent to USD 18,393.2 million in the year ending February 2026, from USD 16,365.5 million in the corresponding period of 2025. The expansion was largely attributable to higher tourism receipts, reflecting strong performance in the services account, together with increased merchandise exports, particularly gold.

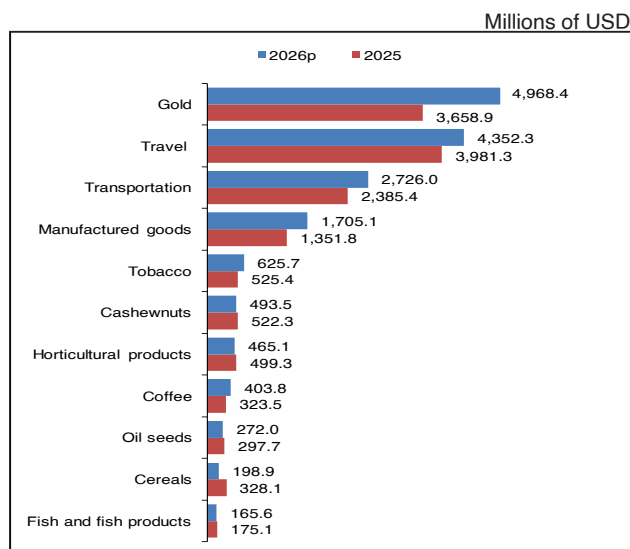

Exports of goods grew by 15 percent to USD 10,872.9 million in the year ending February 2026, from USD 9,451.6 million in the corresponding period of 2025. The expansion was dominated by gold, which accounted for about 45.7 percent of total goods exports, alongside manufactured goods and tobacco (Chart 2.7.2). Gold exports rose sharply by 35.8 percent to USD 4,968.4 million

from USD 3,658.9 million, reflecting favourable global prices. Manufactured goods also recorded a strong growth of 26.1 percent to USD 1,705.1 million from USD 1,351.8 million. This signals a healthy shift toward value-added production and reduced reliance on raw commodities.

Traditional exports registered a growth of 14.5 percent to USD 1,699.6 million in the year ending February 2026, driven by tobacco, coffee, and cotton, benefiting from improved world market prices. On a monthly basis, goods exports amounted to USD 965.2 million in February 2026, compared with USD 710 million in a similar month in 2025, on account of strong performance in gold and manufactured goods.

Chart 2.7.2: Exports of Goods and Services

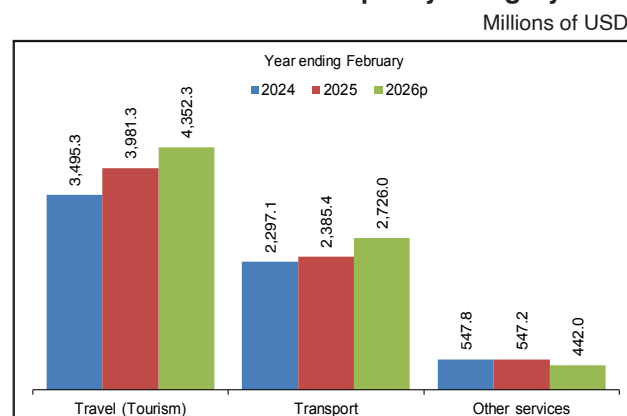

Source: Tanzania Revenue Authority and Bank of Tanzania computations

Note: p denotes provisional data

In the year ending February 2026, the services receipts continued their upward trajectory, increasing by 8.8 percent to USD 7,520.3 million, compared with USD 6,913.9 million in the corresponding period of 2025. The expansion was primarily driven by the tourism earnings, bolstered by a 4.2 percent increase in international tourist arrivals to 2,255,006 visitors (Chart 2.7.3). Transport earnings, primarily freight, also strengthened to USD 2,726 million compared with USD 2,385.4 million in the year earlier. On a monthly basis, service receipts stood at USD

608.6 million in February 2026, up from USD 598.8 million in February 2025.

Chart 2.7.3: Services Receipts by Category

Source: Banks and Bank of Tanzania computations

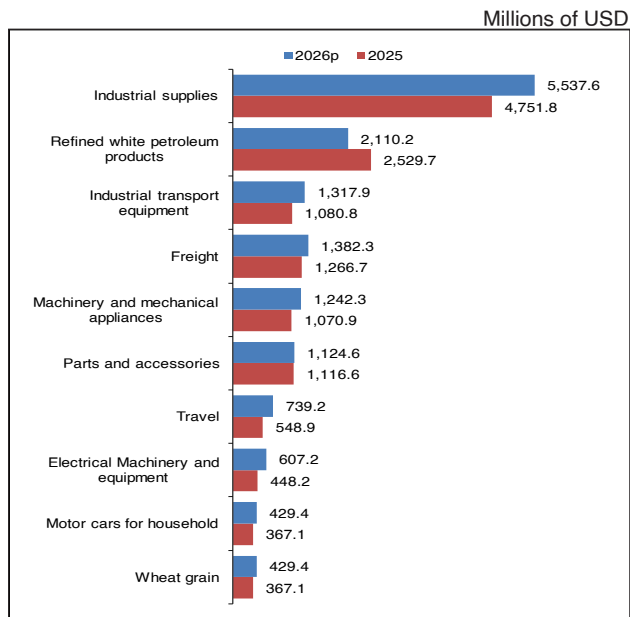

Note: Other services include construction, insurance, financial, telecommunication, computer and information, charges for the use of intellectual property, government, personal, and other business services

Imports

For the year ending February 2026, imports of goods and services rose to USD 18,634.2 million, from USD 17,081.5 million recorded in the corresponding period of 2025. The increase is driven primarily by higher demand for productive inputs, including industrial supplies, transport equipment, machinery, and freight services (Chart 2.7.4). Notably, oil imports, which accounted for 13.8 percent of the total import bill, declined by 16.6 percent to USD 2,110.2 million from USD 2,529.7 million in the previous year, largely explained by softer global prices. On a monthly basis, goods imports amounted to USD 1,252.3 million in February 2026, compared with USD 938.5 million in a similar month in 2025.

Chart 2.7.4: Import of Goods and Services

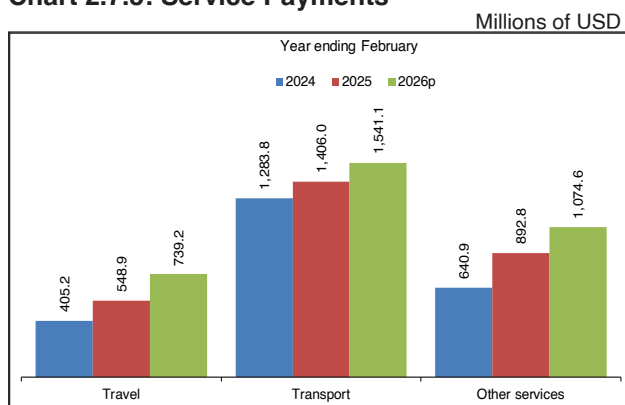

Source: Tanzania Revenue Authority and Bank of Tanzania computations.

Note: p denotes provisional data

Service payments amounted to USD 3,354.9 million in the year ending February 2026, up from USD 2,847.6 million in the same period in 2025. This increase was driven by higher freight payments, in line with the increase in import bill (Chart 2.7.5). On a monthly basis, service payments were USD 285 million, up from USD 228.4 million in February 2025.

Chart 2.7.5: Service Payments

Source: Banks and Bank of Tanzania computations

Note: Other services include construction, insurance, financial, telecommunication, computer and information, government, personal, and other business services

The primary account deficit widened to USD 2,133 million, compared with USD 1,971.8 million in the year ending February 2025, largely explained by higher payments of income on equity and increased interest obligations abroad. On a

monthly basis, the account deficit stood at USD 218.7 million compared to USD 162.9 million in February 2025.

The secondary income account recorded a surplus of USD 265.8 million in the year ending February 2026, lower than USD 531.5 million in the same period in 2025, reflecting a sharp decline in personal transfers. On a monthly basis, the surplus increased to USD 22.7 million from USD 16.9 million in February 2025.

3.0 Economic Performance in Zanzibar

3.1 Inflation Developments

Zanzibar headline inflation remained low, at 4.8 percent, similar to the corresponding month in 2025 (Table 3.1.1 and Chart 3.1.1). The outturn was largely explained by a decrease in non-food inflation that stood at 1.4 percent, easing from 4.1 percent recorded in the corresponding period in 2025. The decrease was mainly due to moderation in prices of goods under the Housing, Water, Electricity, Gas, and Other Fuels category. On a month-on-month basis, headline inflation eased to 0.5 percent, from 2.3 percent recorded in January 2026.

3.2 Government Budgetary Operations

In February 2026, domestic revenue and grants amounted to TZS 185.2 billion, equivalent to 95.6 percent of the monthly target. Of this, domestic revenue reached TZS 174.3 billion, exceeding the target by 4.4 percent. Tax revenue collections continued to be the main source of domestic revenue, accounting for about 92 percent of the total, with all tax categories performing above target, supported by improved tax administration and enhanced compliance. Meanwhile, non-tax revenue totalled TZS 14.4 billion, equivalent to 90 percent of the target (Chart 3.2.1).

Chart 3.2.1: Government Resources in February
Billions of TZS

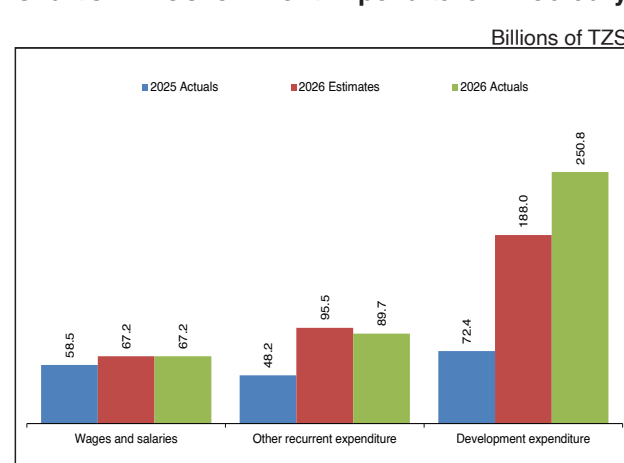

Source: Ministry of Finance and Planning, Zanzibar

Note: Other taxes include hotel and restaurant levies, tour operator levy, revenue stamps, airport, and seaport service charges, road development fund and petroleum levy

During the reviewed period, government spending stood at TZS 407.7 billion, with development expenditure accounting for 61.5 percent of the total. Financing of development expenditure was predominantly domestic, with 88.3 percent sourced from domestic resources. Accordingly, the overall fiscal deficit, amounting to TZS 222.5 billion, was financed through borrowing (Chart 3.2.2).

Chart 3.2.2: Government Expenditure in February

Note: Other recurrent expenditure includes transfers, domestic debt interest payments, consolidated fund service and other charges.

3.3 External Sector Performance

Current account surplus increased by 29.2 percent to USD 912.1 million, compared with the level in the year ending February 2025. The performance was mainly attributable to higher services receipts, particularly from tourism-related activities (Table 3.3.1).

Exports

Exports of goods and services edged up by 25.5 percent to USD 1,625 million in the year ending February 2026, compared with the level in the corresponding period in 2025 (Table 3.3.1). Service receipts remained dominant, accounting for 94.9 percent of the total exports. Similarly, export of goods rose more than twofold to USD 82.2 million, driven by traditional exports, notably cloves, which registered bumper harvest in the year ending February 2026 (Table 3.3.2). On a month-on-month basis, exports of goods and services increased to USD 151.3 million in February 2026 from USD 138.7 million recorded in February 2025.

Note: Other exports mainly include souvenirs and spices; p denotes provisional data; and "----"denotes a change exceeding 100 Percent.

Imports

Imports of goods and services rose by 22.8 percent to USD 743.9 million in the year ending February 2026, compared with the level in the similar period of 2025 (Table 3.3.1). This performance was largely explained by increased imports of capital and consumer goods. The increase in capital goods was largely driven by higher imports of industrial transport equipment, while the rise in consumer goods reflected greater imports of non-industrial transport equipment and other consumer items, including footwear and related products (Table 3.3.3). On a month-on-month basis, imports of goods and services increased to USD 64.6 million in February 2026, up from USD 40.4 million recorded in February 2025.

Note: Multilateral arrears are those owed by the private sector;

¹ denotes debt flows during the period.

² stock position at the end of the period.

Glossary

Broad money (M2)

A definition of money that comprises narrow money (M1) plus domestic currency time and savings deposits of residents with banks in the country.

Central bank rate

Means the interest rate set by the Monetary Policy Committee and used by the Bank to implement or signal its monetary policy stance.

Core inflation

This measures the rate of change in prices of goods and services other than energy, utilities and unprocessed food, over a specified period. The unprocessed food items, energy and utilities are excluded since they are volatile and hence may be affected by non-monetary events, which do not constitute the underlying monetary inflation.

Currency in circulation outside banks

Notes and coins of Tanzanian shillings circulating outside the banking system, i.e., outside the Bank of Tanzania and other depository corporations.

Disbursed outstanding debt

This is the amount of a loan or credit that has already been disbursed to the borrower and has not yet been repaid or forgiven.

Discount rate

Means the rate of interest that the Bank of Tanzania charges to counterparties wishing to discount their Treasury bills for liquidity purposes. It uses the Central Bank Rate (CBR) as a base, plus a loaded factor, which shall be determined and approved by the MPC from time to time, depending on the liquidity situation in the economy.

Exchange rate

The price at which one unit of a currency can be purchased with another currency, for instance, TZS per US dollar.

Extended broad money (M3)

A definition of money that consists of broad money (M2) plus foreign currency deposits of residents with banks in the country.

External debt stock

The stock of a country's debt that is borrowed from foreign lenders through private commercial banks, foreign governments, or international financial institutions. It is the sum of public, publicly guaranteed, and private non-guaranteed long-term debt, use of IMF credit, and short-term debt, which includes all debt having an original maturity of one year or less and interest in arrears on long-term debt.

Food inflation

This is a measure of the rate of change in the price of food, both processed and unprocessed.

Gross official reserves

Gross official reserves consist of external assets that are readily available to and controlled by the Bank of Tanzania for direct financing of balance of payments, and for indirectly regulating the magnitude of balance of payments imbalances through intervention in foreign exchange markets. Gross official reserves comprise the Bank of Tanzania's holdings of monetary gold, Special Drawing Rights (SDRs), reserve position in the International Monetary Fund, and foreign exchange resources available to the Bank of Tanzania for meeting external financing needs.

Inflation

The rate at which the average level of prices of a basket of selected goods and services in an economy is increasing over a period. It is often expressed as a per centage. Inflation indicates a decrease in the purchasing power of a nation's currency.

Interbank cash market

A money market in which banks extend loans to one another for a specified term. Each transaction represents an agreement between the banks to exchange the agreed amounts of currency at the specified rate on a fixed date.

Interest rate-based monetary policy

This is a monetary policy approach used by central banks to control the level of inflation and economic growth by influencing the interest rates in the economy. In this approach, the Bank of Tanzania

sets the policy rate (central bank rate) on a quarterly basis to influence the cost and availability of credit in the economy and uses various instruments, such as open market operations and statutory minimum reserve requirements, to affect the level of liquidity in the economy.

Lombard facility

An overnight facility is provided by the Bank of Tanzania to enable banks to borrow at their own discretion on an overnight basis, by pledging eligible government securities as collateral.

Lombard rate

The Lombard rate is the interest rate charged by the Bank of Tanzania on loans extended to banks through the Lombard facility. It is set at the upper band of the Central Bank Rate (CBR) corridor.

Money supply

The sum of currency circulating outside the banking system and deposits of residents with banks is defined at various levels of aggregation. In Tanzania, three aggregates of money supply are compiled and reported, namely: narrow money (M1), broad money (M2), and extended broad money (M3).

Non-food inflation

This is a measure of price movements caused by factors other than food prices.

Narrow money (M1)

Consists of currency in circulation outside the banking system plus demand deposits (cheque accounts) of residents with banks in the country.

National debt

Total national debt obligations that include public debt and private sector external debt.

Public debt

Debt payable or guaranteed by the Government. Tanzania's public debt comprises two main components: domestic debt (incurred principally to finance the fiscal deficit) and external debt (raised primarily to finance development projects). External debt comprises obligations owed by the Central Government to foreign creditors, as well as external obligations of government departments and agencies

that are guaranteed by the Government.

Primary income account

It comprises income from compensation of employees, interest income, dividends and retained earnings from capital investments, rental income from the use of natural resources and other types of primary income, including those that relate to insurance policy holders and pension funds.

Secondary income account

It entails transfers between residents and non-residents that correspond to the provision of a good, service, financial asset, or other non-produced asset with no corresponding return of an item of economic value.

Overnight interbank cash market

The component of the money market involving the shortest-term loan. Lenders agree to lend borrowers funds only "overnight," i.e., the borrower must repay the borrowed funds plus interest at the start of business the next day.

Repurchase agreements (repo)

An arrangement involving the sale of securities at a specified price with a commitment to repurchase the same or similar securities at a fixed price on a specified future date.

Reverse repo

An arrangement involving the buying of securities at a specified price with a commitment to resell the same or similar securities at a fixed price on a specified future date.

Reserve money (M0)

The Bank of Tanzania's liabilities in the form of currency in circulation outside the banking system, cash held by banks in their vaults, and deposits of banks kept with the Bank of Tanzania in national currency. Reserve money is also referred to as base money, or monetary base, or high-powered money.

Weighted yields of Treasury bills

This is the average yield of Treasury bills, which is weighted by the volume sold of 35-day, 91-day, 182-day, and 364-day Treasury bills, expressed in percentage per year.
