SUMMARY OF ECONOMIC DEVELOPMENTS

Gross Domestic Product

Economic growth prospects for the economy during 2004 are encouraging. Real GDP is projected to grow at 6.3 percent compared with 5.6 percent attained in 2003. This expected outcome is mainly due to the improved performance of the agricultural sector resulting from good weather conditions in the 2004 cropping season. Agriculture is projected to grow at the rate of 4.9 percent during 2004, up from 4.0 percent attained during 2003.

Consumer Price Index

During the quarter ending September 2004, overall inflation averaged to 4.0 percent, down from 6.3 percent recorded during the quarter ending June 2004. The decline was attributed to a substantial decline in food inflation brought about by improved domestic food supply. Non-food inflation however went up slightly to 2.3 percent during the review period from 2.1 percent recorded during the quarter ending June 2004. The increase was largely influenced by changes in prices of petroleum products, power and water.

Broad Money Supply

Broad Money Supply (M2) grew by 20.0 percent on annual basis, compared with the growth rate of 13.5 percent recorded during the corresponding quarter of 2003. The increase in M2 was a result of an increase in net domestic assets (NDA) of the banking system associated with increased credit to the private sector.

Interest Rate Structure

The margin between lending and savings deposit rates widened by 0.6 percentage points

from 11.8 percent recorded during the quarter ending June 2004.

External Sector

The external sector performed relatively well during the review quarter with the current account registering a surplus of 90.1 million from a deficit of US\$ 287.9 million, recorded during the quarter ending June 2004. The outcome was a result of an increase in exports relative to imports.

Exchange Rate

The Tanzanian shilling on average appreciated in nominal terms against the US\$ by 2.6 percent, moving from TZS 1,113.5 per US\$ during the quarter ending June 2004 to TZS 1085.1 per US\$ during the quarter ending September 2004.

Government Budgetary Operations

The overall central government budget deficit (before grants) narrowed to TZS 112.3 billion, from a deficit of TZS 213.5 billion recorded during the quarter ending June 2004. Revenue collections exceeded the projected quarterly target of TZS 406.6 billion by 6.1 percent. Total expenditure amounted to TZS 653.8 billion, being 82 percent of the budgeted amount for the quarter.

Debt Developments

Total national debt (domestic and external) stood at US\$ 8,822.6 million as at the end of September 2004, slightly above the debt stock of US\$ 8,742.3 million recorded during the quarter ending June 2004. The new debt stock was also higher than the debt stock of US\$

8,215.7 million recorded during the corresponding quarter of 2003.

Tanzania Zanzibar Government Budgetary Operations

During the first quarter of 2004/05, the Zanzibar Government budgetary operations recorded an overall deficit (before grants) of TZS 4.0 billion, compared with the deficit of 7.1 billion recorded during the preceding quarter. However, after

considering grants amounting to TZS 3.0 billion, the deficit narrowed down to TZS 1.0 billion.

Tanzania Zanzibar Trade Account

During the quarter ending September 2004, the Zanzibar Trade Account deteriorated to a deficit of US\$ 15.4 million, compared with the deficit of US\$ 8.1 million recorded during the quarter ending June 2004. The widening deficit was a result of an increase in imports bill.

PART 1: ECONOMIC DEVELOPMENTS

1.0 OUTPUT AND PRICE DEVELOPMENTS

1.1 The Overall Economic Performance

Overall performance of the Tanzanian economy during 2004 is expected to be good as there are already clear signs of recovery in agriculture and in a number of non-agricultural sectors. Preliminary statistics indicate that substantial rates of growth have been attained in all major economic sectors during the first half of 2004 (Table 1.1). Real GDP outturn during the period January–June 2004 was above the projected growth rate for the year of 6.3 percent.

Table 1.1: Economic Growth (Jan 2000-June 2004)

1.2 Economic Activities Developments

Primary Sector

The Agricultural Sector performed relatively well during the first half of 2004, compared to its performance in the corresponding period in 2003. Provisional statistics from crop marketing boards indicate that during the quarter ending September 2004, procurement of traditional cash crops increased by 91.3 percent reaching

447,736.3 tons, from 234,001.9 tons procured during the corresponding period in 2003 (Table 1.2a).

Table 1.2a: Procurement of Traditional Cash Crops

Crop	July - September		%
	2003	2004	
Cashew nuts	1,229.2	0.0	-100.0
Coffee	22,403.7	33,888.0	51.3
Cotton	139,533.0	327,303.0	134.6
Sisal	17,605.1	18,500.0	5.1
Tobacco	32,759.8	46,966.2	43.4
Tea	20,471.1	21,079.1	3.0
Total	234,001.9	447,736.3	91.3

Source: Respective Crop Boards

Output growth in the mining sector remained relatively stable at 9.6 percent during the first half of 2004, very close to the growth rate of 10.0 percent attained during the corresponding period in 2003. Provisional statistics further indicate that during the quarter ending September 2004, gold production by large-scale mining companies increased by 6.5 percent to 11,616.73 kilograms, from 10,902.72 kilograms recorded during the corresponding period in 2003.

Secondary Sector

Output growth in manufacturing and construction improved substantially during the first half of 2004. The manufacturing sector grew by 7.3 percent compared with the growth rate of 5.9 percent recorded during the corresponding period in 2003. The improved performance was a result of increased capacity utilization in some of the divested industries such as sugar industries. Other factors that contributed to the improved performance

include revitalization and establishment of new textile establishments under the Export Processing Zones (EPZ) and increased production efficiency arising from the privatised enterprises.

The construction sector registered a growth rate of 8.8 percent during the first half of 2004, almost the same level as that attained during the first half of 2003. The performance of the sector was largely influenced by the supportive government policy, which encouraged private sector participation in the construction and rehabilitation of roads and bridges, buildings (residential and non-residential) and land development.

Tertiary Sector

The tertiary sector comprising of trade, hotels and restaurant (including tourism), electricity and water supply, transport and communication, financial business services and other services recorded a mixed growth performance during the first half of 2004. The electricity and water supply and trade, hotels and restaurants sub sectors recorded reasonable growth rates during the review period compared with the rates of growth attained during the similar period in 2003. Performance of the electricity and water sectors improved in both rural and urban areas, following governments efforts to implement the water sector policy, which encouraged community participation in water projects, construction and rehabilitation of water infrastructure. Other sub sectors; namely transport and communication and financial and business services, grew by lower rates during the review period compared

to levels attained during the corresponding period in 2003.

Food Supply Situation

During the quarter ending September 2004, the Food Security Department (FSD) purchased 35,580 tons of maize from the maize surplus regions compared with 20,445 tons purchased during the corresponding period in 2003. Consequently, the SGR stock increased by 10.3 percent from 61,364 tons recorded during the quarter ending September 2003 to 67,685 tons as at the end of September 2004 (Table 1.2b).

1.3 Price Developments

Headline Inflation

The quarterly year-to-year inflation for the period ending September 2004, stood at 4.0 percent, down from 6.3 percent, recorded during the quarter ending June 2004. The deceleration in the rate of inflation was a result of increased food supply, which pushed down food inflation.

Non-food inflation

During the quarter ending September 2004, non-food inflation rose to 2.3 from an average of 1.5 percent, recorded during the quarter ending June 2004. The increase was a result of increased prices of fuel, power and water, furniture and household equipments and household operations and maintenance sub groups.

Food Inflation

Food inflation declined from the rate of 6.4 percent recorded during the quarter ending June 2004 to an average rate of 5.3 percent as at the end of September 2004. The food inflation rate during the quarter ending September 2003 was 4.5 percent (**Table 1.3**).

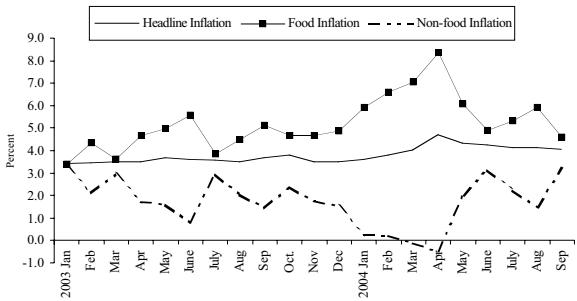

Table 1.3: Quarterly Inflation

Sub-groups	July– Sep Weight (%)	2003		% Change

Chart 1: Annual Headline, Food and Non-Food Inflation, January–September 2004

2.0 MONETARY AND FINANCIAL DEVELOPMENTS

2.1 Money and Credit

During the quarter ending September 2004, Broad Money Supply (M2) grew by 20.0 percent, compared with the growth rate of 19.1 percent attained during the quarter ending June 2004. The growth rate of M2 was however, still below the annual growth target of 20.2 percent.

In nominal terms, M2 increased by TZS 104.0 billion reaching TZS 1980 billion compared with an increase of TZS 99.1 billion recorded during the quarter ending June 2004 (**Chart 2.1a**).

Credit to the private sector increased by TZS 61.3 billion, from TZS 966.0 billion recorded as at the end of June 2004 to TZS 1,027.0 billion at the end of September 2004. However on annual basis, the growth of commercial bank's credit to the private sector declined from the average of 41.8 percent, at the end of June 2004 to 34.3 percent at the end of September 2004.

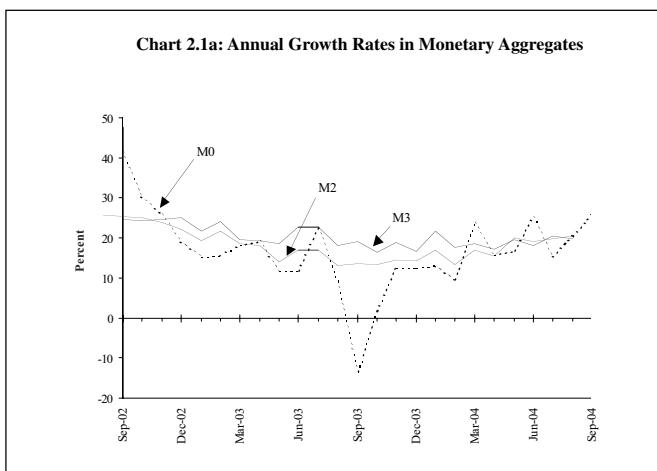

During the review quarter, Net Foreign Assets (NFA) of the banking system increased by TZS 156.0 billion from the end of June 2004 position largely on account of inflow of donor funds from development partners.

Source: Bank of Tanzania, Monetary and Financial Affairs Dept

The review quarter also witnessed a relatively higher increase in commercial bank deposits of TZS 64.0 billion, compared with an increase of TZS 58.3 billion recorded during the quarter ending June 2004. Currency in circulation increased by TZS 54.0 billion, compared with an increase of TZS 66.8 billion recorded as at the end of June 2004 (**Table 2.1**).

Extended Broad Money Supply (M3) that includes broad money (M2) and foreign currency deposits (FCD) increased by TZS 193.0 billion, compared with an increase of TZS 125.3 billion recorded during the quarter ending June 2004. The increase in M3 was largely explained by the rise in M2, which was associated with an increase in currency in circulation. Currency in circulation increased due to high demand for cash arising from the need to finance crop purchasing transactions following relatively better harvests and withdrawals made in favour of various donor funded projects.

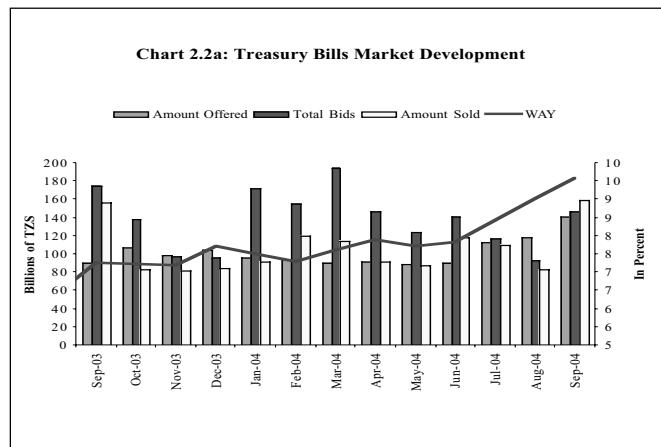

2.2 Financial Markets

Treasury Bills Market

During the quarter ending September 2004, Treasury bills worth TZS 341.4 billion were sold compared with bills worth TZS 295.5 billion

sold during the preceding quarter. Demand for Treasury bills fell from TZS 410.7 billion recorded during the quarter ending June 2004, to TZS 358.3 billion. The decline in demand was related to the increased demand for cash to finance crop purchases as well as increased preference amongst banks to extend credit to private sector.

Commercial banks continued to account for the lion's share in the treasury bills market, accounting for more than 60 percent of the successful bids. Yields across all maturities went up from the levels recorded in June 2004, with the 364 day Treasury bill rate registering the highest increases of 2.2 percentage points. Consequently, the overall weighted average yield (WAY) for all maturities rose to 9.6 percent as at the end of September 2004 from 7.8 percent in June 2004.

Treasury Bonds

During the review quarter, Treasury bonds experienced low demand, as institutional investors (mainly pension funds) changed their preference in favour of real estate. Amounts offered were TZS 67.4 billion while bids received were worth TZS 41.1 billion only and sales amounted to about TZS 40.0 billion. Despite the shift in demand, pension funds

remained dominant players in the market, accounting for more than 85.0 percent of total bids. They were followed by commercial banks whose bids accounted for less than 10 percent.

The weighted average yield (WAY) across all maturities rose except for the 7-year Treasury bond, which fell slightly to 10.4 percent in September 2004 from 10.7 percent recorded in June 2004. The yields for the 2-year Treasury bond rose to around 11.0 percent, from 8.8 percent recorded in June 2004, while that of the 5-year Treasury bond rose to 11.6 percent from 6.7 percent. The yields for the 10-year Treasury bond rose to 12.6 percent from 11.7 percent recorded in June 2004.

Repurchase Agreement (REPOs)

During the quarter ending September 2004, REPOS worth TZS 81.0 billion were transacted between the Bank of Tanzania and Commercial banks, compared with TZS 64.9 billion transacted during the quarter ending June 2004. The average REPO rate went up to 5.3 percent from 4.5 percent recorded during the quarter ending June 2004.

Discount Rate Policy

During the quarter under review, banks did not access the Lombard facility, thus reflecting high liquidity situation prevailing in the banking system. However, the discount rate increased to 14.4 percent, from 12.5 percent recorded as at the end of June 2004.

Inter-bank Cash Market Transactions

During the quarter ending September 2004, the volume of transaction in the inter bank cash

market was almost twice the amount traded during the quarter ending June 2004 of TZS 891.0 billion, with overnight transactions accounting for more than 70.0 percent of the total volume traded. Overnight interest rates during the quarter fluctuated between 5.5 percent and 6.8 percent, rising towards the end of every month.

Interest Rate Structure

During the quarter ending September 2004, the spread between lending rates and savings deposit rates widened by 0.6 percentage points, reaching 12.4 percent, from 11.8 percent recorded during the quarter ending June 2004. Likewise, overall time deposit rates increased from 4.3 percent in June to 4.6 percent, being the highest for the past three years. Interest rates offered to prime customer deposits fluctuated widely above the rates offered to small depositors, even though they declined from an average of 7.7 percent in June 2004 to 6.4 percent as at the end of September 2004. With regards to foreign currency deposits, weighted average interest rates exhibited a downtrend, partly due to the appreciation of the shilling against major currencies.

Consistent with the increase in the returns on financial assets, overall lending rates of commercial banks went up, from an average of 14.2 percent in June 2004 to 14.9 percent in September 2004. However, the increase was recorded only on long-term loans. Interest rates on loans rates on loans maturity in less than 2 years declined. Prime borrowers continued to benefit from lower cost of funds, as the negotiated lending rates averaged 8.5 percent during September 2004, down from around 10 percent recorded in June 2004 (**Table 2.2a**).

Inter-bank Foreign Exchange Market (IFEM)

During the quarter ending September 2004, the volume traded at the IFEM increased by 34.8 percent to US\$ 245.4 million, from US\$ 182.1 million recorded during the preceding quarter (Table 2.2b). Commercial banks' participation resulted in a net purchase of US\$ 48.2 million, while non-bank financial institutions made a net sale of US\$ 12.1 million. Bank of Tanzania intervention in the market resulted in a net sale of US\$ 36.1 million, which is equivalent to 14.7 percent of the volume traded.

Bureau de Change Operations

The total volume of transactions conducted by the Bureau de change system went up by 11.9 percent to US\$ 164.7 million, from US\$ 147.2 million transacted during the quarter ending June 2004.

The Bureau buying and selling rates appreciated by 1.8 percent and 2.2 percent to TZS 1,083.6 per US dollar and TZS 1,096.0 per US dollar respectively.

Exchange Rate

The Tanzanian shilling appreciated against the US dollar by 2.6 percent, moving from TZS 1,113.5 per US dollar as at the end of June 2004 to TZS 1,085.1 per US dollar as at the end of September 2004. However, during the quarter ending June 2004, the shilling depreciated by 1.2 percent.

3.0 PUBLIC FINANCE

3.1 Government Finance

During the quarter ending September 2004, the government budget recorded an overall deficit before grants of TZS 112.3 billion against the estimated deficit of TZS 248.9 billion. However, after considering grants amounting to TZS 318.0 billion, the budget recorded a surplus of TZS 205.7 billion.

Revenue Performance

During the period under review, revenue collections amounted to TZS 431.8 billion, against the projected amount for the quarter of TZS 406.6 billion. Revenue collections exceeded projections following improvement in Tax revenue, resulting from the ongoing changes in tax policy, reforms in tax administration, reduction of tax exemptions, and improvements in custom services (**Chart 3.1a**).

Expenditure Developments

During the period under review, total government expenditure¹ amounted to TZS 653.8 billion, representing 82.0 percent of the estimates. The lower than targeted expenditure was attributed to the time taken to formalize and finalize the process of procurement of goods and services. Expenditure on priority sectors however amounted to TZS 92.4 billion in line with the budget estimates. Education received the largest share amounting to TZS 28.5 billion, followed by health, which received TZS 22.2 billion and roads TZS 17.8 billion. The remainder financed expenditure in agriculture, justice and legal services, water and other sectors

Chart 3.1a: Revenue Performance July-September 2004/05
Actual against Estimates

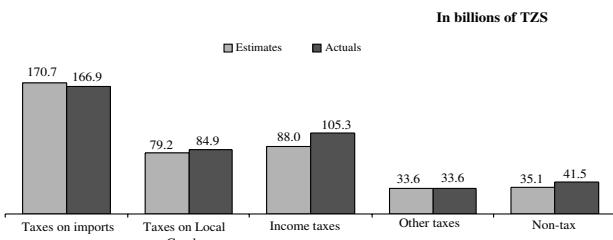

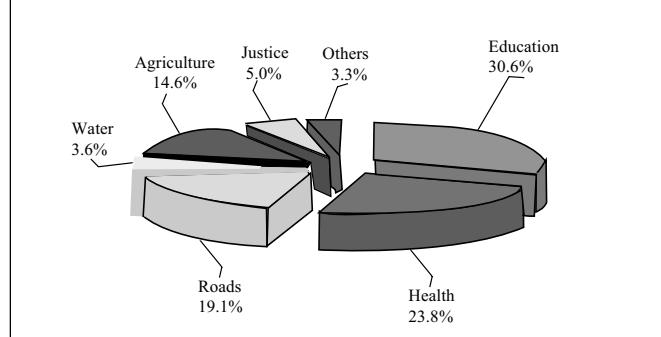

Chart 3.1b: Priority Sector Spending July-September 2004

¹ Excluding float

Financing

As a result of good tax revenue performance, significant donor funds inflows, and lower than projected expenditure, the government was able to reduce its domestic obligations by TZS 104.6 billion, against the borrowing target of TZS 32.1 billion.

3.2 Central Government Debt

Total debt stock (domestic and external) stood at US\$ 8,822.6 million as at the end of September 2004, being US\$ 80.4 million or 0.9 percent higher than the debt stock of US\$ 8,742.2 million as at the end of June 2004. The new stock of debt was also higher than the debt stock of US\$ 8,215.7 million registered during the corresponding quarter of 2003. The increase in debt stock over the one-year period is mainly attributed to new disbursements (on old and new loans), accumulation of interest arrears on un-serviced loans and exchange rate fluctuations.

External Debt

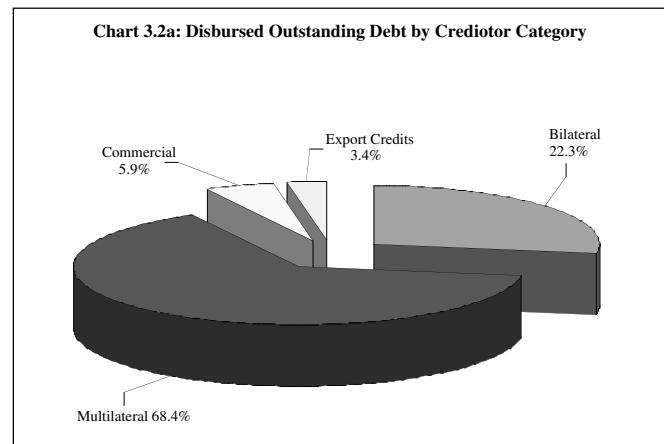

The external debt stock (disbursed outstanding debt plus interest arrears) recorded by the end of September 2004 was US\$ 7,909.0 million. This amount was higher by US\$ 52.0 million or 0.7 percent than the external debt stock amount of US\$ 7,857.0 million registered at the end of June 2004. During the review period, disbursed outstanding debt (DOD) increased by US\$ 69.9 million.

The Profile of External Debt

Disbursed Outstanding Debt by Creditor Category

The profile of disbursed outstanding debt by creditor category indicates that, as at the end of September 2004, 68.4 percent, 22.3 percent and 5.9 percent of total external debt were owed to multilateral, bilateral and commercial creditors

respectively. The remaining 3.4 percent was owed to suppliers' creditors (**Chart 3.2a**).

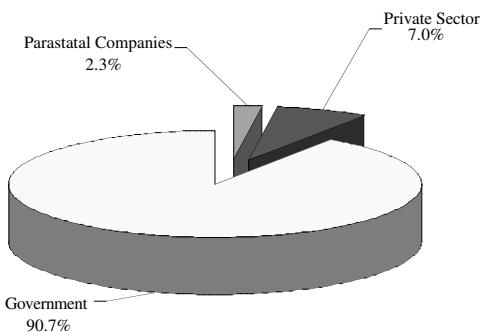

Analysis of disbursed outstanding debt by creditor category shows that bilateral debt grew by 1.5 percent; multilateral debt grew by 1.0 percent; while commercial debt went up by 1.3 percent from the levels recorded in June 2004. However, when compared to the previous year, the multilateral debts have increased by 14.7 percent while bilateral debts have declined by 7.0 percent. Commercial and export credits share have increased by 2.9 percent and 1.3 percent respectively. The substantial increase in multilateral debts has been due to the government policy of borrowing concessional loans that are currently being offered by multilateral creditors only. Bilateral debts have decreased due to bilateral debt cancellations.

Disbursed Outstanding Debt by Borrower Category

The profile of disbursed outstanding debt by borrower category shows that as at the end of September 2004, the government was the largest borrower accounting for 90.7 percent of the total debt followed by private sector with 7.0 percent and parastatal companies which accounted for 2.3 percent of total debt (**Chart 3.2b**).

Chart 3.2b Disbursed Outstanding Debt by Borrower Category

Debt Contracted, Disbursements and Repayments

During the quarter under review, new loans contracted and recorded amounted to US\$ 121.1 million, while total debt service payments amounted to US\$ 34.8 million against the scheduled debt service of US\$ 44.1million. Lower debt service payments were attributed to multilateral institutions debt relief and non-servicing of part of Non Paris Club bilateral loans. During the preceding quarter, actual debt service payments were US\$ 24.4 million.

Enhanced Highly Indebted Poor Countries (HIPC) Debt Relief

Multilateral Debt Relief

During the quarter under review, Tanzania continued to receive a total of US\$ 19.37 million as HIPC debt relief from multilateral institutions (Table 3.2b). Of this amount, US\$ 10.56 million came from International Development Association (IDA), US\$ 4.86 million from African Development Bank (ADB), US\$ 2.03 million from International Monetary Fund (IMF), US\$ 0.32 million from the International fund for Agricultural development (IFAD), US\$ 0.24 million from European Investment Bank (EIB) and US\$ 1.36 million came from Nordic Development Fund (NDF). Multilateral creditors including the World Bank, International Monetary Fund, African Development Bank, European Investment Bank, International Fund for Agricultural Development and Nordic Trust Fund have been offering debt relief in the form of debt service reduction since 2000/01, resulting in lower debt service payments for the country. As at end September 2004, total relief received from multilateral creditors under HIPC arrangement stood at US\$ 305.64 million.

Bilateral Paris Club Debt Relief

As at end September 2004, Tanzania had concluded bilateral agreements with governments of Austria, Belgium, Canada, France, Germany, Italy, Norway, the Netherlands, United Kingdom, USA, Russia and Japan, leading to cancellation of debts worth US\$ 858.7 million under Paris Club VII arrangement (Table 3.2b). Efforts are under way to have the remaining bilateral agreements signed with Brazil and other Japanese agencies namely EID/MITI and Japanese Food Agency.

Table 3.2b: Status of Paris Club (PC) VII Implementation

Source: Bank of Tanzania

For non Paris Club Bilateral Creditors, only Bulgaria, India and Kuwait have offered debt relief in line with the HIPC framework. Bulgaria has offered debt relief by cancelling debts amounting US\$ 15.1 million. India has offered debt relief by cancelling all her intergovernmental loans amounting US\$ 19.7 million. Kuwait has

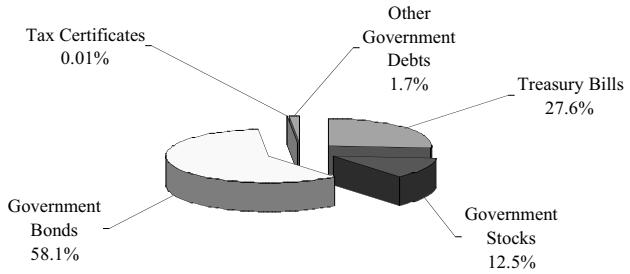

offered debt relief by rescheduling debts amounting US\$ 31.8 million. China has offered debt relief outside the HIPC framework by cancelling debts worth US\$ 37.7 million. Dialogue has been initiated with Abu Dhabi Fund, Libya and Iran but no firm commitment has been made so far.

Domestic Debt

During the quarter under review, domestic debt stock decreased by 1.2 percent from TZS 980.3 billion, recorded as at end June 2004 to TZS 968.8 billion. The decline in domestic debt is explained by redemption of government bonds.

Domestic Debt by Instruments

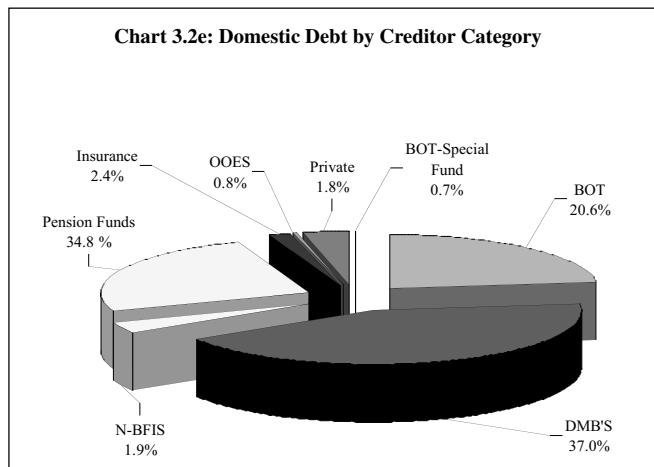

Analysis of domestic debt by instruments indicates that, government securities accounted for 98.3 percent of total domestic debt and the remaining 1.7 percent comprises of other government debts. Government bonds accounted for 58.1 percent; Treasury bills, 27.6 percent; Government stocks, 12.5 percent; while Tax certificates accounted 0.01 percent of total domestic debt (**Chart 3.2d**).

Chart 3.2d: Domestic Debt By Instrument

Domestic Debt by Creditor Category

During the quarter under review, commercial banks continued to be the largest government creditors, holding claims worth TZS 358.7 billion or 37.0 percent of total debt stock.

Pension funds followed with claims worth TZS 337.5 billion or 34.8 percent. Bank of Tanzania was third by holding claims worth TZS 199.2 billion or 20.6 percent. Non-bank financial institutions, Insurance companies and private sector claims were 1.9, 2.4, and 1.8 percents respectively. Other official entities and the BOT special funds altogether were holding total claims equivalent to 1.5 percent of total domestic debt (**Chart 3.2e**).

Domestic Debt Service

A total of TZS 138.5 billion being the sum of principal and interest fell due for payment during the quarter under review, compared with TZS 126.3 billion that fell due during the quarter ending June 2004. Out of the amount due, TZS 15.2 billion was paid out of government revenue while TZS 123.3 billion representing part of principal was rolled over.

4.0 EXTERNAL SECTOR DEVELOPMENTS

4.1 Balance of Payments

During the quarter ending September 2004, the overall balance of payments (BOP) recorded a surplus of US\$ 111.8 million, compared with the deficit of US\$ 110.6 million recorded during the quarter ending June 2004. The outcome was a result of significant increases in donor inflows (**Chart 4.1**).

4.2 Current Account

During the review period, the current account improved from a deficit of US\$ 287.9 million, recorded during the quarter ending June 2004 to a surplus of US\$ 90.1 million owing to substantial increases in government grants. Donor disbursements for budget support increased from US\$ 74.1 million, recorded in the previous quarter to US\$ 334.5 million. Also, when compared with the corresponding quarter of 2003, donor inflows increased by US\$ 130.7 million (**Table 4.2a**).

Goods exports

During the quarter under review, total goods exports increased from US\$ 255.8 million, recorded during the quarter ending June 2004 to US\$ 324.9 million following increases of both traditional and non-traditional exports.

Traditional exports increased to US\$ 56.7 million partly due to the increases in export volumes of cotton and tobacco (Table 4.2b). The surge in export volumes of cotton and tobacco was a result of the onset of peak season for most of the traditional crops in the country

Similarly, non-traditional exports increased by 37.5 percent to US\$ 281.6 million following an increase in exports of gold, manufactured goods, fish and fish products and other exports.

The increase in gold exports was an outcome of the surge in the world market prices largely associated with the weakness of the US dollar and global security concerns.

Goods Imports

During the quarter ending September 2004, goods imports (f.o.b) decreased by 3.1 percent from US\$ 548.4 million, recorded during the preceding quarter to US\$ 532.7 million largely due to the huge declines in intermediate goods imports in particular oil imports. Oil imports declined by 51.1 percent to US\$ 57.7 million on account of the decrease in imported volume.

The decline in import volume was to a large extent associated with huge volumes of oil imported in June 2004, following concerns on supply disruptions associated with the introduction of flow meters in July 2004. On the other hand, food imports declined by 41.6 percent on account of the decrease in importation of cereals particularly rice and maize following improvements in food situation in the country.

Services Account

During the review period, the deficit in the services account declined from US\$ 56.9 million, recorded during the preceding quarter to US\$ 19.3 million. This follows an increase in services receipts coupled with the decline in service payments. The increase in services receipts was largely due to increase in receipts from travel and government services. The surge in travel receipts is largely associated with the onset of the peak tourist season that normally starts in July to September. On the other hand, services

payments declined despite the significant increase in construction services. The decline in service payments was mainly due to the decrease in transportation, other business and communication services. The decline in transportation payments is consistent with the decline in goods imports recorded during the period under review.

Income Account

The income account (net) recorded a deficit of US\$ 16.6 million, up from a deficit of US\$ 11.5 million recorded during the preceding quarter

largely due to the decrease in income receipts coupled with an increase in income payments.

Current transfers

During the quarter ending September 2004, net current transfer inflows increased from US\$ 74.4 million recorded during the preceding quarter to US\$ 333.8 million. Much of the increase was

attributed to the significant increase in budgetary support funds from US\$ 20.1 million, disbursed during the preceding quarter to US\$ 280.5 million. The development is in line with the decision made by donors to frontload the disbursements in order to enable the government to meet the planned disbursements' target for the first quarter of 2004/05.

Note: - = Small value; — = Very big value; — = Information not available

4.3 Capital and Financial Account

During the review quarter, the capital and financial account recorded a surplus of US\$ 6.7 million only, down from the surplus of US\$ 76.7 million recorded during the quarter ending June 2004. This development is largely attributed to the worsening in the financial account as a result of the increase in other investments.

4.4 Gross reserves

As at the end of September 2004, the stock of gross international reserves stood at US\$ 2,003.1 million, compared with the stock level of US\$ 1,878.0 million attained as at the end of June 2004. The new level of reserves was sufficient to cover for about 8.0 months of imports of goods and non-factor services.

4.5 World Commodity Prices

During the quarter ending September 2004, the prices of coffee, Robusta and Arabica went down by 7.2 percent and 2.3 percent, respectively (Table 3). The decline in the prices of coffee was due to excess supply of the commodity arising from the favourable weather conditions in Brazil and Vietnam. As for cotton, the decline in prices was largely due to bumper production in USA, China, India, Pakistan and Uzbekistan.

Prices of cloves and tea (Mombassa) went up by 5.6 percent and 3.9 percent respectively, while the price of sisal (UG) remained unchanged at US\$ 885.0 per metric ton. The increase in the price of cloves was largely

attributed to the rise in demand for cloves from the Indonesian Kretek cigarette manufactures. On the other hand, the surge in tea prices was largely due to strong demand from the United Kingdom, Pakistan, Yemen and Russia.

During the quarter under review, prices of crude oil (average of U. K. Brent, Dubai and West Texas Intl), Dubai (f. o. b.) and white petroleum products (f. o. b. West Mediterranean) recorded increases, mainly due to concerns of supply disruptions in Iraq, Venezuela, Nigeria and Russia. Moreover, there was a surge in oil demand from the United States, India and China. As for gold, the weakness of the US dollar against other major currencies continued to exert an upward pressure on the price of gold. Also, the tensions in the Middle East made investors opt for gold as a more secure investment.

5.0 ECONOMIC DEVELOPMENTS IN TANZANIA ZANZIBAR

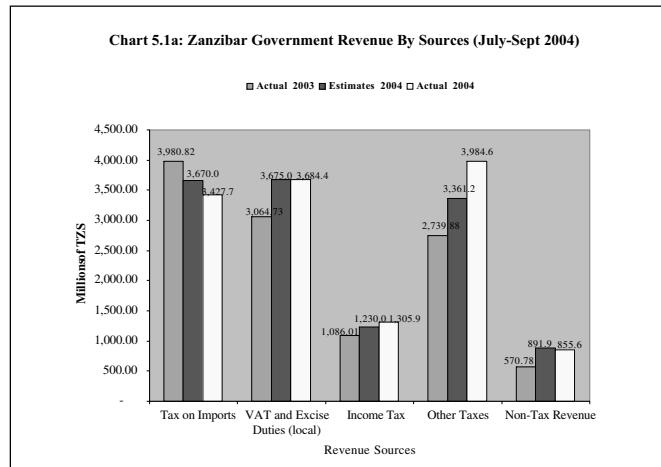

5.1 Overall Performance

During the quarter ending September 2004, the Zanzibar Government budgetary operations on cheques issued basis recorded an overall deficit of TZS 4.0 billion before grants, compared with the deficit of TZS 7.1 billion recorded during preceding quarter. However, after considering grants amounting to TZS 3.0 billion, the deficit declined to TZS 1.0 billion.

Government Revenue

During the period from July to September 2004, total revenue collections amounted to TZS 13.3 billion, which is higher than the amount of TZS 11.7 billion collected during the quarter ending June 2004. Revenue collection surpassed the quarterly target of TZS 12.8 billion by 3.9 percent, largely due to the increase in taxes on imports, income taxes and other taxes associated with compliance.

Performance by revenue category reveals that, tax on imports amounted to TZS 3.4 billion or 91.9 percent of the projected TZS 3.7 billion. VAT and excise duty (local) amounted to TZS 3.7 billion, and was equal to the amount targeted for the quarter. Income tax collections amounted to TZS 1.3 billion, surpassing the target of TZS 1.2 billion by 8.3 percent. Collection from other taxes category amounted to TZS 4.0 billion, being 17.6 percent higher than the targeted amount of TZS 3.4 billion. Non-tax revenue amounted to TZS 0.9 billion, and was also equal to the amount targeted for the quarter (**Chart 5.1a**).

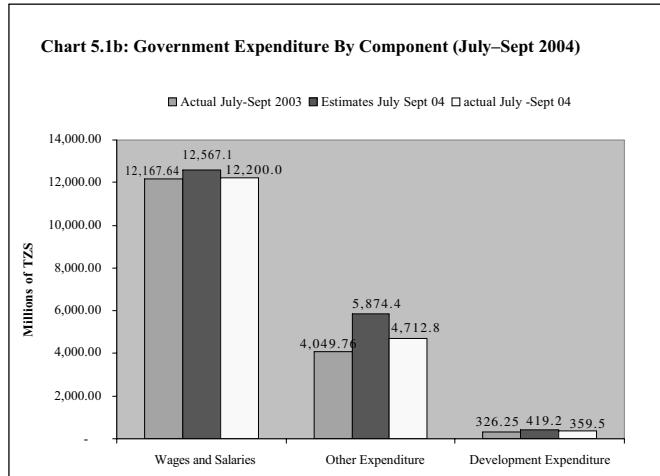

Government Expenditure

During the quarter under review, total government expenditure amounted to TZS 17.3 billion, representing 91.5 percent of the targeted expenditure ceiling for the quarter of TZS 18.9 billion. Total expenditure during the review quarter was also lower than the expenditure amount of TZS 18.8 billion registered during the preceding quarter.

Recurrent expenditure amounted to TZS 16.9 billion, accounting for 97.7 percent of the total expenditure. This amount was 8.2 percent below the targeted expenditure ceiling for the quarter of TZS 18.4 billion. Wages and salaries accounted for the largest share of expenditure reaching TZS 12.2 billion or 72.2 percent of total recurrent expenditure. Other expenditures amounted to TZS 4.7 billion, accounting for 27.8 percent of total recurrent expenditure.

Development expenditure, amounted to TZS 0.4 billion, representing 2.3 percent of the total

expenditure for the quarter (**Chart 5.1b**).
Financing

During the quarter under review, domestic resources and grants from the Union Government financed the entire amount of government expenditure.

5.2 Debt Developments

Total debt stock (domestic and external) as at the end of September 2004 stood at TZS 165.0 billion equivalent to US\$ 155.6 million, out of which 72.4 percent was external debt and 27.6 percent was domestic debt.

The new level of debt stock was 39.6 percent higher than the debt stock amount of TZS 118.2 billion recorded during the quarter ending June 2004. The increase in debt stock relates to new borrowings and accumulated interest arrears.

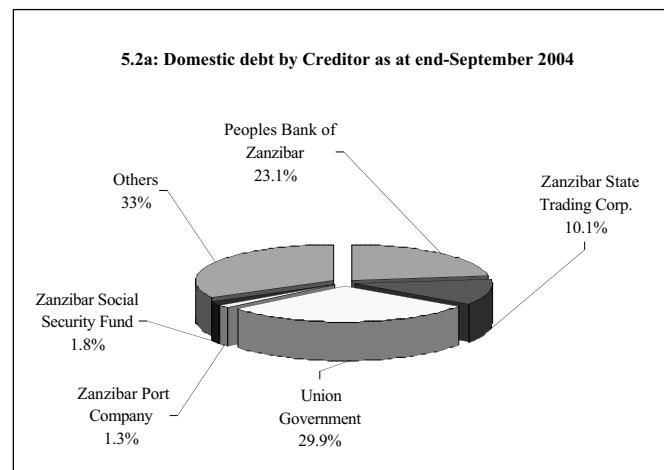

Domestic Debt

During the period under review, Zanzibar's domestic debt declined by 9.9 percent, from TZS

50.5 billion recorded during the quarter ending June 2004 to TZS 45.5 billion. However, when compared with the corresponding quarter of 2003, domestic debt increased by 2.7 percent.

Domestic Debt - By Creditors

The profile of domestic debt by creditor reveals that as at the end of September 2004, the Zanzibar government indebtedness to the Union Government amounted to TZS 13.6 billion, representing 29.9 percent of total domestic debt. People's Bank of Zanzibar claims amounted to TZS 10.5 billion or 23.1 percent. Zanzibar State Trading Corporation, Zanzibar Social Security Fund, and Zanzibar Port Company claims were TZS 5.1 billion, TZS 0.8 billion, and TZS 0.6 billion accounting for 11.2 percent, 1.8 percent, and 1.3 percent of total domestic debt respectively. Other creditors' claims stood at TZS 14.9 billion or 32.7 percent of the total domestic debt (**Chart 5.2a**).

Domestic Debt by Instruments

The profile of domestic debt by instrument shows that as at the end of September 2004, government borrowing through Treasury bills amounted to TZS 2.5 billion or 5.4 percent of

total domestic debt. Treasury bonds amounted to TZS 3.3 billion or 7.1 percent. Government stocks amounted to TZS 5.4 billion or 11.9 percent of total domestic debt. Borrowing

through other debt instruments amounted to TZS 23.9 billion, or 52.5 percent of total domestic debt (**Table 5.2a**).

Table 5.2a: Zanzibar Domestic Debt by Instruments

Domestic Debt by maturity

The profile of domestic debt by maturity indicates that, debts with maturity of less than a year amounted to TZS 5.8 billion or 12.6 percent of total domestic debt. Those with maturity of between 1-2 years amounted to 13.9

billion, or 30.4 percent. Debts maturing between 2-5 years stood at TZS 0.8 billion or 1.8 percent, while debts with undetermined maturity (largely pensioner's claims) amounted to TZS 25.1 billion or 55.2 percent of total domestic debt (**Table 5.2b**).

External Debt

As at the end of September 2004, the Zanzibar Government's external debt increased by 85.1 percent, from US\$ 60.9 million recorded during the preceding quarter to US\$ 112.7 million. The remarkable increase was mainly associated with new borrowings from multilateral sources.

External Debt by Creditor Category

The profile of external debt by creditor category indicates that, multilateral creditors' claims amounted to US\$ 94.3 million, accounting for 83.7 percent of total external debt. Bilateral creditors claims stood at US\$ 10.9 million or 9.6 percent of total external debt. Commercial and other private creditors claims (mainly supplier's credits) amounted to US\$ 7.5 million, accounting for 6.7 percent of total external debt (**Chart 5.2b**).

Chart 5.2b: External debt by Creditor as at end-September 2004

External Debt by Maturity

Debts with maturity of between 5 and 10 years amounted to US\$ 8.4 million, accounting for 7.4 percent of total external debt. Those with maturity of between 10 and 20 years amounted to US\$ 10.7 million or 9.5 percent. Debts with maturity of above 20 years amounted to US\$ 93.5 million, representing 83.1 percent of total external debt (**Table 5.2c**).

External debt by Use of Funds

Classification of external debt by use of funds shows that as at the end of September 2004, Transport and Communication Sector received US\$ 40.4 million or 35.8 percent of total disbursements. Social Welfare and Education received US\$ 29.8 million accounting for 26.5 percent of the total. Energy and Agriculture sectors each received US\$ 16.9 million and US\$ 13.7 million representing 15.0 percent and 12.2 percent of total disbursements respectively. Industries received US\$ 3.0 million or 2.7 percent, while other sectors including Finance and Insurance absorbed US\$ 8.9 million or 7.9 percent (**Chart 5.2c**).

5.3 Foreign Trade Developments

During the quarter ending September 2004, the trade account (goods and services) recorded a deficit of US\$ 15.4 million, against a deficit of US\$ 8.1 million recorded during the quarter ending June 2004. The deterioration was attributed to higher imports relative to exports (**Table 5.3a**).

Table 5.3a: Trade Account (Goods and Services)

Goods Account

During the period under review, the Zanzibar goods account recorded a deficit of US\$ 19.2 million, compared with a deficit of US\$ 11.6 million registered during the quarter ending June 2004. The new deficit level was also higher than the deficit of US\$ 14.6 recorded during the corresponding period in 2003 (**Table 5.3b**).

Exports

Total exports of goods for the quarter under review increased by 63.6 percent, from US\$ 1.1 million recorded during the quarter ending June 2004 to US\$ 1.8 million. Traditional exports increased from US\$ 0.1 million to US\$ 1.2 million, following improvement in export prices and volume of cloves.

Non-traditional exports declined by 45.5 percent to US\$ 0.6 million, from US\$ 1.1 million recorded during the preceding quarter. The

decline was due to poor performance of seaweeds and manufactured goods exports mainly arising from poor quality of the product (Table 5.3c).

Imports

During the quarter under review, overall imports (c.i.f.) increased by 66.9 percent from US\$ 13.9 million, recorded during the quarter ending June 2004 to US\$ 23.2 million. The increase follows a rise in imports of capital and

intermediate goods, which increased by 25.4 percent and 90.2 percent respectively. Consumer goods imports also rose by 27.6 percent from US\$ 5.8 million as at the end of June 2004 to US\$ 7.4 million during the quarter ending September 2004 (Table 5.3d).

Balance on Services and Income Account

During the quarter ending September 2004, the services account recorded a surplus of US\$ 3.8 million, compared with the surplus of US\$ 3.5 million recorded during the quarter ending June

2004. The outcome follows increased services receipts that outweighed the increase in service payments. The increase in service receipts is related with an increase in tourist activities (**Table 5.3e**).

6.0 INTERNATIONAL ECONOMIC OUTLOOK

The quarter ending September 2004 witnessed declines in growth rates of most advanced economies, with the exception of the US economy. GDP growth rates for Japan, Canada and Euro Zone as a whole declined during the review period compared with the rates attained during the quarter ending June 2004. The weak economic performance was to a large extent influenced by increases in oil prices in the world market coupled with the appreciation of the Euro against the US dollar. Despite the recorded declines in economic growth, unemployment rates either stagnated or declined in most of the advanced economies except in Germany only where the rate of unemployment rose marginally. Inflation rates also declined in most of the advanced economies. Also in an attempt to reduce further the inflationary pressure United States, Canada and United Kingdom raised the key interest rates.

6.1 Economic Developments in Advanced Economies

The US economy grew by 3.7 percent as at the end of September 2004, up from 3.0 percent recorded during the quarter ending June 2004. Increased consumer spending as well as investment activities drove this growth record. The increase in investment activities had a positive impact on the labour market as it led to a decline in the unemployment rate from 5.6 percent recorded during the preceding quarter to 5.4 percent. The Federal Reserve Bank further raised its benchmark rate by 0.5 basis points to 1.75 percent.

The UK economy grew by 0.4 percent during the quarter ending September 2004, down from the growth rate of 0.9 percent attained during the preceding quarter. The decline in GDP growth rate was attributed by declines in output production in industries as a result of increase in oil prices, high interest rates and weak external demand. Inflation rate during the quarter ending September 2004 however remained slightly above the Bank of England target of 2 percent. Unemployment rate also declined marginally during the review quarter.

In Japan, real GDP slowed down from 0.4 percent recorded at the end of June 2004 to 0.3 percent. The outcome was a result of declines in consumer spending and business investments.

In the Euro Zone as a whole, the growth rate of output declined thus reflecting the slowing down in business investments and consumer spending. Despite the registered declines in growth rate of output, inflation and unemployment rates also declined although by small margins.

In Canada real GDP slowed down during the quarter ending September 2004 to 0.8 percent, from 1.0 percent recorded during the preceding quarter. This was largely due to the decline in exports associated with the appreciation of the Canadian dollar. Despite the slowing down in the growth rate of output, industrial production performed relatively well thus containing the pressure on inflation and unemployment rates.

6.2 Economic Developments in EAC and selected SADC countries

In the EAC Region, inflation rate in Tanzania went down while Kenya and Uganda both recorded increases in inflation with Kenya registering the highest inflation rate of 14.4 percent. The decline in inflation in Tanzania resulted mainly from improved domestic food supply, which pushed down food inflation. Inflation pressures in Kenya and Uganda were largely attributed by increases in food prices and increased prices of petroleum products (**Table 6.2**).

With the exception of Zambia where inflation rate rose to 18.7 from 17.9 in the previous

quarter, inflation rate in the SADC region slowed down. The decline in inflation was mainly associated with deceleration in food prices in region.

Note:

* Adjusted for seasonal movements or seasonal variations, which refer to identical, or almost identical, patterns, which a time series appears to follow during the corresponding months (quarters) of successive years. Such movements are due to recurring events, which take place annually, as for example, the increase of food prices during Ramadhan.

** Percentage change of the Total NCPI is **Headline Inflation**, while the percentage change of the Non-Food NCPI is **Non-food Inflation**.

Notes:

- 1) Imports data (f.o.b) for 1999 - 2001 have been revised using new ratios for freight and insurance services.
- 2) Following changes in the ratios of freight and insurance services to the total imports (c.i.f), figures for services account have consequently been revised.
- 3) All other revisions for 2001 data are done to accommodate new information received during 2002.
- 4) Beginning 2000 onwards, all data for direct investment are provisional.
- 5) GDP-Gross Domestic Product, mp-Market price, CAB-Current Account Balance, p = provisional

Notes:

- 1) Imports data (f.o.b) for 1999 - 2001 have been revised using new ratios for freight and insurance services.
- 2) Following changes in the ratios of freight and insurance services to the total imports (c.i.f), figures for services account have consequently been revised.
- 3) All other revisions for 2001 data are done to accommodate new information received during 2002.
- 4) Beginning 2000 onwards, all data for direct investment are provisional.
- 5) GDP-Gross Domestic Product, mp-Market price, CAB-Current Account Balance, p = provisional

Note:

- 1) Figures for 2004 are provisional
- 2) Prior to 2002 figures for TZS were converted from USD using quarterly average exchange rates. Beginning 2002 monthly average exchange rates are used to compute figures in TZS.
- 3) Prior to July 1997 export figures were obtained from CD3 forms processed through Customs Dept, Crop Boards, Ministry of minerals, TPDC and staff estimates while import statistics were estimated on the basis of issued import licenses, Import Declaration Forms and PSI Reports.

Note:

Figures for 2004 are provisional

- Prior to 2002 figures for TZS were converted from US\$ using quarterly average exchange rates.

Beginning 2002 monthly average exchange rates are used to compute figures in TZS.

-Volume in '000 Tons; Value in Millions of TZS; Unit Price in TZS/Ton

-Since 1999 onwards clove exports started to be reported separately before they were reported under other exports.

-Prior to July 1997 export figures were obtained from CD3 forms processed through Customs Dept, Crop Boards,

Ministry of Minerals, TPDC and staff estimates.
