SUMMARY OF GLOBAL AND DOMESTIC ECONOMIC PERFORMANCE

Global economic growth remained subdued in the second quarter of 2025. A primary driver of this sluggish performance was ongoing trade tensions, particularly the intermittent tariff hikes and retaliatory measures between major trading partners, in particular the United States and China, which disrupted supply chains and dampened global trade volumes. Despite this, there are signs of cautious optimism. The OECD projects global GDP growth at 2.9 percent for 2025 and 2026¹, while the International Monetary Fund (IMF), in its World Economic Outlook Update (July 2025), raised its 2025 global growth forecast to 3.0 percent from 2.8 percent (April 2025) and 2026 projection to 3.1 percent from 3.0 percent. This adjustment follows the easing of trade tensions, driven by diplomatic efforts and provisional trade agreements among key global economies. On the inflation front, conditions remained broadly stable across most economies, with rates hovering near central bank targets. This stability was supported in part by declining crude oil prices, which helped mitigate inflationary pressures amid ongoing global uncertainties. However, the outlook remains uncertain due to risks from potential trade restrictions, rising geopolitical tensions, and increasing extreme climate events.

The domestic economy grew by 5.4 percent during the first quarter of 2025 compared to 5.2 percent in the corresponding period in 2024 and unchanged from 5.4 percent growth recorded in the quarter ending December 2024. The agriculture sector remained the leading contributor to this growth, followed by finance and insurance, construction and, transportation and storage. Supportive government measures and policies aimed at enhancing the overall business environment continue to be a major driver of overall growth. As for Inflation, it remained moderate, edging up slightly to 3.2 percent in the second quarter of 2025 compared to 3.1 percent in the same period of 2024. Despite this uptick, the rate remained below the national target range of 3–5 percent, and well within regional convergence criteria—under 8 percent for the East African Community (EAC) and within the 3–7 percent band for the Southern African Development Community (SADC). The increase in inflation was primarily driven by elevated food prices, consistent with trends observed in the previous quarter. Looking ahead, inflation is expected to remain within both national and regional thresholds. Notwithstanding, persistent trade frictions, tariff disputes, and geopolitical tensions pose upside risks to global commodity prices, which could exert renewed pressure on headline inflation.

During the quarter under review, the Monetary Policy Committee (MPC) maintained the Central Bank Rate (CBR) at 6.0 percent, to mitigate risks associated with trade tensions and geopolitical uncertainties, while continuing to support economic growth. Liquidity conditions in the banking sector were aligned with economic fundamentals, thereby facilitating banks' credit extension to the private sector. Despite overall liquidity adequacy, the 7-day interbank rate hovered near the upper band of the CBR corridor, signaling persistent segmentation within the money market. The ongoing revision of the collateral management framework and reforms in the interbank market are expected to enhance liquidity distribution across financial institutions. Meanwhile, money supply continued to expand, driven by steady growth in credit to the private sector—reflecting easing financial conditions and a strengthening business climate.

Amid global trade dynamics, the current account balance widened during the quarter under review, reaching USD 1,239.1 million compared with USD 872.1 recorded in the same period of 2024. The deficit was driven primarily by a surge in imports, outpacing export growth. Imports of capital and intermediate goods, particularly machinery, mechanical appliances, industrial transport equipment, and industrial supplies, rose sharply, reflecting sustained investment in industrialization and transport infrastructure. Meanwhile, export

¹ OECD, Economic Outlook, Volume 2025 Issue 1 (Paris: OECD Publishing, June 3, 2025)

performance strengthened, with significant gains in tourism, gold, cereals, coffee, and tobacco.

As for Zanzibar, the economy recorded a growth rate of 6.4 percent in the first quarter of 2025, matching the performance observed in the corresponding period of 2024. Growth was primarily driven by robust activity in accommodation and food services—mainly tourism, crop and livestock production, transport and storage, and financial and insurance services. Inflation averaged 4.2 percent, down from 5.3 percent in the quarter ending June 2024. This decline was largely attributed to easing food prices, supported by adequate market supply. On the fiscal side, it remained strong, with revenue collection exceeding targets by 6.5 percent, while government expenditure increased in line with the continued implementation of infrastructure and investment projects. Zanzibar’s current account surplus expanded significantly to USD 104.0 million, compared to USD 29.4 million in the same period of 2024. This improvement was supported by a notable rise in exports of goods and services.

GLOSSARY

Broad money (M2)

A definition of money that comprises narrow money (M1) plus domestic currency time and savings deposits of residents with banks in the country.

Central bank rate

This is the interest rate set by the Monetary Policy Committee and used by the Bank to implement or signal its monetary policy stance.

Core inflation

This measures the rate of change in prices of goods and services other than energy, utilities and unprocessed food, over a specified period. The unprocessed food items, energy and utilities are excluded since they are volatile and hence may be affected by non-monetary events, which do not constitute the underlying monetary inflation.

Currency in circulation outside banks

Notes and coins of Tanzanian shillings circulating outside the banking system, i.e. outside the Bank of Tanzania and other depository corporations.

Disbursed outstanding debt

This is the amount of a loan or credit that has already been disbursed to the borrower and has not yet been repaid or forgiven.

Discount rate

The rate of interest rate used by Bank on counterparties wishing to re-discount their Treasury bills for liquidity purposes. It uses the prevailing Central Bank Rate (CBR) as a base plus a loaded factor, which can be changed from time to time depending on the liquidity situation in the market. Currently the applicable loaded factor is 250 basis points.

Exchange rate

The price at which one unit of a currency can be purchased with another currency, for instance, TZS per US dollar.

Extended broad money (M3)

A definition of money that consists of broad money (M2) plus foreign currency deposits of residents with banks in the country.

External debt stock

The stock of a country's debt that is borrowed from foreign lenders through private commercial banks, foreign governments, or international financial institutions. It is the sum of public, publicly guaranteed, and private non-guaranteed long-term debt, use of IMF credit, and short-term debt, which includes all debt having an original maturity of one year or less and interest in arrears on long-term debt.

Food inflation

This is a measure of the rate of change in the price of food, both processed and unprocessed.

Gross official reserves

Gross official reserves consist of external assets that are readily available to and controlled by the Bank of Tanzania for direct financing of balance of payments, and for indirectly regulating the magnitude of balance of payments imbalances through intervention in foreign exchange markets. Gross official reserves comprise the Bank of Tanzania's holdings of monetary gold, Special Drawing Rights (SDRs), reserve position in the International Monetary Fund, and foreign exchange resources available to the Bank of Tanzania for meeting external financing needs.

Inflation

The rate at which the average level of prices of a basket of selected goods and services in an economy is increasing over a period. It is often expressed as a percentage. Inflation indicates a decrease in the purchasing power of a nation's currency.

Interbank cash market

A money market in which banks extend loans to one another for a specified term. Each transaction represents an agreement between the banks to exchange the agreed amounts of currency at the specified rate on a fixed date.

Interest rate-based monetary policy

This is a monetary policy framework used by central banks to attain macroeconomic objectives by influencing interest rates in the economy. Using this approach, the Bank of Tanzania sets the policy rate (Central Bank Rate) on quarterly basis to influence the level of interest rates in the economy and uses various instruments, such as open market operations, statutory minimum reserve requirements to affect the level of the liquidity in the economy.

Lombard facility

An overnight loan facility that was established to enable banks to borrow from the Bank of Tanzania at their own discretion, by pledging eligible government securities as collateral.

Lombard rate

The interest rate that the Bank of Tanzania charges on overnight loans it extends to banks. This rate uses the Central Bank Rate (CBR) as a base plus a loaded factor, which can be changed from time to time depending on the supply of shilling liquidity in the economy. Currently the applicable loaded factor is 200 basis points and act as the upper band of the Central Bank Rate Corridor.

Money supply

The sum of currency circulating outside the banking system and deposits of residents with banks is defined at various levels of aggregation. In Tanzania, three aggregates of money supply are compiled and reported, namely: narrow money (M1), broad money (M2), and extended broad money (M3).

Non-food inflation

This is a measure of price movements caused by factors other than food prices.

Narrow money (M1)

Consists of currency in circulation outside the banking system plus demand deposits (cheque account) of residents with banks in the country.

National debt

Total national debt obligations that include public debt and private sector external debt.

Public debt

Debt payable or guaranteed by the Government. Tanzania's public debt has two main components, domestic debt (which is incurred principally to finance fiscal deficit) and external debt (which is raised primarily to finance development projects). It comprises the debt central government owes to foreign creditors and external obligations of government departments and agencies that are guaranteed for repayment by the Government).

Primary income account

It comprises income from compensation of employees, interest income, dividends and retained earnings from capital investments, rental income from the use of natural resources and other types of primary income including those that relate to insurance policy holders and pension funds.

Secondary income account

It entails transfers between residents and non-residents that correspond to the provision of a good, service, financial asset, or other non-produced asset with no corresponding return of an item of economic value.

Overnight interbank cash market

The component of the money market involving the shortest-term loan. Lenders agree to lend borrowers funds only "overnight" i.e. the borrower must repay the borrowed funds plus interest at the start of business the next day.

Repurchase agreements (repo)

An arrangement involving the sale of securities at a specified price with a commitment to repurchase the same or similar securities at a fixed price on a specified future date.

Reverse repo

An arrangement involving the buying of securities at a specified price with a commitment to re-sale the same or similar securities at a fixed price on a specified future date.

Reserve money (M0)

The Bank of Tanzania's liabilities in the form of currency in circulation outside the banking system, cash held by banks in their vaults and deposits of banks kept with the Bank of Tanzania in national currency. Reserve money is also referred to as base money, or monetary base or high-powered money.

Weighted yields of Treasury bills

This is the average yield of Treasury bills, which is weighted by the volume sold of 35-day, 91-day, 182-day, and 364-day Treasury bills, expressed in percentage per year.
