SUMMARY OF GLOBAL AND DOMESTIC ECONOMIC PERFORMANCE

The global economy maintained steady but moderate growth, supported by sustained private consumption and easing monetary policy in major economies. The International Monetary Fund projects global real GDP growth at 3.2 percent in 2024 and 3.3 percent in 2025, with emerging and developing economies contributing the most¹. Global inflation continued to decline, driven by lower energy and goods prices. Most economies recorded a decline in inflation, with advanced economies' central banks nearing their target. Several central banks have continued cutting policy rates, contributing to loose global financial conditions². Broadly, the global economic landscape remains favourable with the expectation of more policy rate easing as inflation continues to decline in most economies. Notwithstanding, the escalation of geopolitical conflicts and trade remain a risk.

The domestic economy was strong, with GDP growth reaching 5.9 percent in the third quarter of 2024, higher than 5.6 percent in the corresponding quarter in 2023. Growth was primarily driven by agriculture, financial and insurance services, construction, and mining and quarrying. Inflation remained stable, with annual headline inflation averaging 3 percent, slightly lower than the 3.1 percent recorded in the quarter ending December 2023. The stability was largely ascribed to steady food prices following adequate market supply, bolstered by favourable weather and improved input utilization. Inflation is expected to remain low in the near term on account of improved agricultural productivity, stable exchange rates and moderating global commodity prices.

The Bank continued to implement monetary policy in line with the country's broader macroeconomic objectives. In the course of implementation, the Monetary Policy Committee maintained the Central Bank Rate at 6 percent for the quarter ending December 2024 to minimise the pass-through effects of the exchange rate depreciation on inflation and keep inflation below the medium-term target of 5 percent. The level of shilling liquidity in the banking system was low at the beginning of the quarter but improved towards the end of the quarter. Low liquidity in banks was attributed mainly to a more than projected increase in seasonal demand for cash to cater for crop purchases, an increase in commercial banks holdings of foreign assets, a rise in investment in government securities by non-bank institutions mainly individuals, and the impact of monetary policy. Nevertheless, money supply growth remained high, reaching 13.1 percent during the review quarter compared with 10.7 percent in the previous quarter, driven largely by private sector credit.

On the fiscal side, the government maintained fiscal consolidation, with domestic revenue collection reaching 99.5 percent of the target, and tax revenue exceeding projections by 2.2 percent. The outturn was largely explained by increased economic activity and enhanced tax administration. Public debt remained sustainable, with a moderate risk of distress. In present value terms, the public debt-to-GDP ratio stood at 41.1 percent in 2023/24, below the threshold of 55 percent and the East African Community ceiling of 50 percent. In nominal terms, the ratio was 46.3 percent, well within the SADC benchmark of 60 percent.

The external sector improved as a result of improved global and domestic economic conditions. The current account deficit narrowed to USD 642 million from USD 1,024.5 million in the same quarter of 2023, largely driven by an increase in exports relative to imports. Exports of goods and services rose by 23 percent

¹ IMF World Economic Outlook, January 2025 Update.

² IMF World Economic Outlook, January 2025 Update.

to USD 4,602.1 million in the quarter ending December 2024, with the key contributors being cashew nuts, coffee, tobacco, gold, and horticultural products, particularly vegetables. Imports of goods and services also increased by 6.3 percent to USD 4,767.1 million, mainly driven by industrial transport equipment and industrial supplies.

The performance of the Zanzibar economy was satisfactory, with GDP growth accelerating to 7.5 percent in the third quarter of 2024 from 7 percent in the same quarter of 2023. Key growth drivers included accommodation and food services, fishing, construction, trade, and real estate. Inflation averaged 5.1 percent, down from 6.1 percent in the quarter ending December 2023, ensuing from a decrease in the price of some food items. Revenue collection was 96.4 percent of the target, while government expenditure increased driven by spending on development projects. Consequently, the fiscal deficit widened. Zanzibar's current account surplus rose to USD 167.1 million, up from USD 136.6 million in the corresponding quarter of 2023, supported by higher services receipts and a reduction in imports.

GLOSSARY

Money supply

The sum of currency circulating outside the banking system and deposits of residents with banks defined in various levels of aggregation. In Tanzania, three aggregates of money supply are compiled and reported, namely, narrow money (M1), broad money (M2), and extended broad money (M3).

Narrow money (M1)

Consists of currency in circulation outside the banking system plus demand deposits (cheque account).

Broad money (M2)

Comprises of narrow money (M1) plus fixed-term and savings deposits of residents with banks in the country.

Extended broad money (M3)

Consists of broad money (M2) plus foreign currency deposits of the residents with banks in the country.

Reserve money (M0)

Also referred as base money, or the monetary base or high-powered money. This includes currency in circulation outside the banking system, cash held in the vaults of banks and deposits of banks kept with the Bank of Tanzania in national currency.

Currency in circulation outside banks

Notes and coins of Tanzanian shillings circulating outside the banking system, i.e., outside the Bank of Tanzania and banks.

Disbursed Outstanding Debt

This is the amount of debt that has been disbursed but yet to be paid back or forgiven.

Discount rate

The rate of interest at which the Bank of Tanzania charges on loans it extends to banks. It uses

Treasury bills rate as a base plus a loaded factor, which can be changed from time to time depending on the liquidity situation in the market.

Exchange rate

The price at which one unit of a currency can be purchased with another currency.

External debt stock

The stock of a country's debt that is borrowed from foreign lenders through private commercial banks, foreign governments, or international financial institutions. It is the sum of public, publicly guaranteed, and private non-guaranteed long-term debt, use of IMF credit, and short-term debt (includes all debt having an original maturity of one year or less and interest in arrears on long-term debt).

Gross Official Reserves

Gross official reserves consist of external assets that are readily available to and controlled by the Bank of Tanzania for direct financing of balance of payments, and for indirectly regulating the magnitude of balance of payments imbalances through intervention in foreign exchange markets. Gross official reserves comprise the Bank of Tanzania's holdings of monetary gold, special drawing rights (SDRs), reserve position in the International Monetary Fund, and foreign exchange resources, available to the Bank of Tanzania for meeting external financing needs.

Inflation

The rate at which the average level of prices of a basket of selected goods and services in an economy is increasing over a period. It is often expressed as a percentage. Inflation indicates a decrease in the purchasing power of a nation's currency.

Food inflation

This is a measure of the rate of change of price of food both processed and unprocessed food.

Non-food inflation

This is a measure of price movements caused by factors other than food prices.

Core inflation

This measures the rate of change in prices of goods and services other than energy, utilities and unprocessed food, over a specified period of time. The unprocessed food items, energy and utilities are excluded since they are volatile and hence may be affected by non-monetary events, which do not constitute the underlying monetary inflation.

Interbank Cash Market

A money market in which banks extend loans to one another for a specified term of not more than 90 days. Each transaction represents an agreement between the banks to exchange the agreed amounts of currency at the specified rate on a fixed date.

Overnight Interbank Cash Market

The component of the money market involving the shortest-term loan. Lenders agree to lend borrowers funds only "overnight" i.e. the borrower must repay the borrowed funds plus interest at the start of business the next day.

Lombard facility

An overnight loan facility available for banks to borrow from the Bank of Tanzania at their own discretion, by pledging eligible government securities as collateral.

Lombard rate

The interest rate that the Bank of Tanzania charges bank for borrowing through Lombard facility. This rate is computed basing on the prevailing weighted average yield of 35-day Treasury bill, repo or overnight inter-bank rate, whichever is higher in the market plus a margin.

National Debt

Total national debt obligations that include public debt and private sector external debt.

Public Debt

Debt payable or guaranteed by the Government. Tanzania's public debt has two main components, domestic debt (which is incurred principally to finance fiscal deficit) and external debt (which is raised primarily to finance development projects and comprises of debt the Central Government owes to foreign creditors and external obligations of government departments and agencies that are guaranteed for repayment by the Central Government).

Repurchase agreement (repo)

An arrangement involving the sale of securities at a specified price with a commitment to repurchase the same or similar securities at a fixed price on a specified future date. Repo are initiated by Bank of Tanzania for mopping up excess liquidity in banks.

Reverse repo

Simply the same as a repurchase agreement from the buyer's viewpoint. It is an arrangement that involves buying of securities at a specified price with a commitment to resale the same or similar securities at a fixed price on a specified future date. Reverse repo are initiated by Bank of Tanzania to inject liquidity in banks.

Transferable deposits

Comprise of all deposits that are immediately convertible into currency and directly usable for making payments by cheques, draft, giro order, direct debit/credit or other payment facility without any kind of significant restriction or penalty.

Other deposits

Include all claims reflecting evidence of deposit other than transferable deposits. Typical examples are saving and fixed-term deposits.

Weighted yields of Treasury bills

This is the average yield of Treasury bills, which is weighted by the volume sold of 35-day, 91-day, 182-day, and 364-day Treasury bills, expressed in percentage per year.
